Soviet Russia today

Soviet Warship Development 1917-1937:

Soviet Warship Development: 1917-1937 Siegfried Breyer, 1992 The only comprehensive study of the development of Soviet warship design and construction from tsarist warship construction to Soviet construction programs through 1937

The French Revolutionary Tradition in Russian and Soviet Politics, Political Thought, and Culture Jay

Bergman, 2019-08-14 Because they were Marxists the Bolsheviks in Russia both before and after taking power in 1917 believed that the past was prologue that embedded in history was a Holy Grail a series of mysterious but nonetheless accessible and comprehensible universal laws that explained the course of history from beginning to end Those who understood these laws would be able to mould the future to conform to their own expectations But what should the Bolsheviks do if their Marxist ideology proved to be either erroneous or insufficient if it could not explain or explain fully the course of events that followed the revolution they carried out in the country they called the Soviet Union Something else would have to perform this function The underlying argument of this volume is that the Bolsheviks saw the revolutions in France in 1789 1830 1848 and 1871 as supplying practically everything Marxism lacked In fact these four events comprised what for the Bolsheviks was a genuine Revolutionary Tradition The English Revolution and the Puritan Commonwealth of the seventeenth century were not without utility the Bolsheviks cited them and occasionally utilized them as propaganda but these paled in comparison to what the revolutions in France offered a century later namely legitimacy inspiration guidance in constructing socialism and communism and not least useful fodder for political and personal polemics *Soviet Motor*

Torpedo Boats of World War II Przemyslaw Budzbon, 2025-03-27 In the 1920s and 30s aircraft designer Andrey Tupolev designed a series of advanced torpedo boats for the USSR Superbly illustrated this is their first history in English The Soviet Navy's fast attack craft were inspired by the 1919 Kronstadt raid conducted by British hydroplaning torpedo armed Coastal Motor Boats CMBs The first were to be CMB copies but with Soviet shipbuilding incapable of the project it was handed to the Aerodynamic Institute headed by Andrey Tupolev Built with aircraft engines and technology his 50kt boats were as photogenic as they were bumpy and noisy and made a vivid impression on propaganda newsreels Some were adapted with remote control guidance a pioneering development of the naval drone Written by a former Soviet naval architect this book is the first in English to offer a history of these fascinating dashing craft He explains that technically advanced but flawed the Sh 4 and G 5 had no opportunity to act in their designated role in World War II Instead some were employed instead as landing craft while others were rearmed and used as minelayers or subchasers Many were adapted as fire support craft with Katyusha rocket launchers installed Packed with superb new artwork and unpublished photos it examines Tupolev's torpedo boats as well as the handful of other MTBs the Soviet Union fielded It is an account of a rare impressive design in the prewar Soviet Navy

The Rise and Fall of the Soviet Navy in the Baltic 1921-1941 Gunnar Åselius, 2004-06 This book based on extensive work in Russian archives investigates how strategy organisational rivalry and cultural factors came to shape

naval developments in the Soviet Union up to the invasion of 1941 Focussing on the Baltic Fleet the author shows how the perceived balance of power in northern Europe came to have a major influence on Soviet naval policy during the 1920s and 1930s The operational environment of a narrow inland sea like the Baltic would have required a joint approach to military planning but the Soviet navy s weak position among the armed services made such an approach hard to attain The Soviet regime also struggled against the cultural heritage of the tsarist navy and the book describes how this was overcome In a special Appendix dedicated to the purges of 1937-38 surviving party records from the Baltic Fleet Intelligence Section are used to illustrate the mechanisms of the Great Terror at local level

Reader's Guide to Military History Charles Messenger,2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations

Soviet Russia Today, 1917-1937 Soviet Russia today,1937

The Royal Navy and Fishery Protection Jon Wise,2023-10-12 From the first recorded mention of British ships protecting of fishing vessels in the late fourteenth century through to recent controversies over the change in emphasis to border patrols and overseas deployments the story of the Royal Navy s Cinderella Fleet involves many dramatic incidents until now however there has never been a book dedicated to the subject Naval historian Jon Wise s new work will rectify this omission Historically there have been two main reasons why protecting fishing vessels was so important first fish have always constituted an essential part of the nation s diet while secondly fishermen have been an important source of skilled personnel for the Royal Navy itself It is claimed that the Fishery Protection Squadron FPS is the oldest in the fleet pre dating the formal creation of the Navy itself in the early part of the sixteenth century yet it still remains comparatively little known The Squadron s most famous operations were the Cod Wars of 1958-76 but for six centuries it has been engaged in the many important tasks of protection and policing of fishing fleets though more recently it has turned its attention to patrolling oil and gas fields overseeing quotas and sustainability and policing the ongoing disagreements over who can fish where and when The author covers subjects as diverse as the battles with the Dutch for dominance in the North Sea the protection of fishing on the eastern seaboard of America and the role of the Squadron in the two World Wars Containing many first hand accounts this thought provoking narrative will be of particular interest to all those RN personnel who have served in the Squadron and is set to become the definitive account of this vital but often unsung component of Britain s naval forces and its impact on national life
