## Space And Time In Homer:

**Space and Time in Homer** Geoffrey C. Horrocks, 1984

**Space, Time and Language in Plutarch** Aristoula Georgiadou, Katerina Oikonomopoulou, 2017-10-10 Space and time have been key concepts of investigation in the humanities in recent years. In the field of Classics in particular they have led to the fresh appraisal of genres such as epic historiography, the novel and biography by enabling a close focus on how ancient texts invest their representations of space and time with a variety of symbolic and cultural meanings. This collection of essays by a team of international scholars seeks to make a contribution to this rich interdisciplinary field by exploring how space and time are perceived, linguistically codified and portrayed in the biographical and philosophical work of Plutarch of Chaeronea, 1st-2nd centuries CE. The volume's aim is to show how philological approaches in conjunction with socio-cultural readings can shed light on Plutarch's spatial terminology and clarify his conceptions of time, especially in terms of the ways in which he situates himself in his era's fascination with the past. The volume's intended readership includes Classicists, intellectual and cultural historians and scholars whose field of expertise embraces theoretical study of space and time along with the linguistic strategies used to portray them in literary or historical texts.

**The March of Time** Friedel Weinert, 2013-04-03 The aim of this interdisciplinary study is to reconstruct the evolution of our changing conceptions of time in the light of scientific discoveries. It will adopt a new perspective and organize the material around three central themes which run through our history of time reckoning: cosmology and regularity, stasis and flux, symmetry and asymmetry. It is the physical criteria that humans choose: relativistic effects and time-symmetric equations or dynamic kinematic effects and asymmetric conditions that establish our views on the nature of time. This book will defend a dynamic rather than a static view of time.

**The Routledge Handbook of Literature and Space** Robert Tally Jr., 2017-01-06 The spatial turn in literary studies is transforming the way we think of the field. The Routledge Handbook of Literature and Space maps the key areas of spatiality within literary studies, offering a comprehensive overview but also pointing towards new and exciting directions of study. The interdisciplinary and global approach provides a thorough introduction and includes thirty-two essays on topics such as Spatial theory and practice, Critical methodologies, Work sites, Cities and the geography of urban experience, Maps, territories, readings. The contributors to this volume demonstrate how a variety of romantic, realist, modernist and postmodernist narratives represent the changing social spaces of their world and of our own world system today.

**Origins and Futures: Time Inflected and Reflected** Raji C. Steineck, Claudia Clausius, 2013-05-16 *Origins and Futures: Time Inflected and Reflected* provokes an interdisciplinary dialogue about culture, politics and science's strategies to divert the relentless trajectory of time. Literature, socio-political policy, physics among other subjects demonstrate the human refusal to enlist in temporal determinism. Articles ranging from how detective fiction and international terrorism manipulate the narration of events to the unlocking of political trauma through forgiveness to the
