The pentagon model was adapted? adopted to assess the socio-spatial aspects in comparison to different age groups since it gives a novel viewpoint on human-environment relations sociospatially, as well as embracing the community context. The pentagon model provides five dimensions: person (demographic and household characteristics), place (transportation, walkability, social infrastructure, and shopping), people (neighborliness, and activities with neighbors), perception (attachment, satisfaction with home and neighborhood, and safety and security), and process (participation). A questionnaire survey is conducted in Karsiyaka, Izmir, and resulted in 288 valid samples. The results show
