State Building And Late Development:

State Building and Late Development David Waldner, 2018-05-31 Why does state building sometimes promote economic growth and in other cases impede it Through an analysis of political and economic development in four countries Turkey Syria Korea and Taiwan this book explores the origins of political economic institutions and the mechanisms connecting them to economic outcomes David Waldner extends our understanding of the political underpinnings of economic development by examining the origins of political coalitions on which states and their institutions depend He first provides a political model of institutional change to analyze how elites build either cross class or narrow coalitions and he examines how these arrangements shape specific institutions state society relations the nature of bureaucracy fiscal structures and patterns of economic intervention He then links these institutions to economic outcomes through a bargaining model to explain why countries such as Korea and Taiwan have more effectively overcome the collective dilemmas that plague economic development than have others such as Turkey and Syria The latter countries he shows lack institutional solutions to the problems that surround productivity growth The first book to compare political and economic development in these two regions State Building and Late Development draws on and contributes to arguments from political sociology and political economy Based on a rigorous research design the work offers both a finely drawn comparison of development and a compellingly argued analysis of the character and consequences of precocious Keynesianism the implementation of Keynesian demand stimulus policies in largely pre industrial economies

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future

The End of the Developmental State? Michelle Williams, 2014-01-10 The End of the Developmental State brings together leading scholars of development to assess the current status of the developmental state in several developing and transitional economies of South Korea Taiwan Ireland the United Kingdom

China South Africa Brazil and India Has the concept of the developmental state become outmoded These authors would suggest not However they do argue that the historical trajectories of developmental states in Asia Latin America Africa and Europe suggest all too clearly that the concept must be re examined critically and creatively The range and diversity of their positions and their rejection of stale programmatic positions from the past will revitalize the debate on the role of the state in social and economic transformation in the twenty first century By bringing together careful comparative analyses of national cases in both the Global North and South the volume highlights pivotal conditions economic restructuring domestic politics epistemic shifts and ecological limits that are forcing revision of the goals and strategies of developmental states and suggests that states that ignore these new conditions will indeed see the end of the developmental state **Hard Times in**

the Lands of Plenty Benjamin B. Smith,2007 Smith deciphers the paradox of the resource curse and questions its inevitability through an innovative comparison of the experiences of Iran and Indonesia Education and State Formation

A. Green,2013-10-23 Education has always been a key instrument of nation building in new states National education systems have typically been used to assimilate immigrants to promote established religious doctrines to spread the standard form of national languages and to forge national identities and national cultures They helped construct the very subjectivities of citizenship justifying the ways of the state to the people and the duties of the people to the state In this second edition of his seminal and widely acclaimed book on the origins of public education in England France Prussia and the USA Andy Green shows how education has also been used as a tool of successful state formation in the developmental states of East Asia While human capital theories have focused on how schools and colleges supply the skills for economic growth Green shows how the forming of citizens and national identities through education has often provided the necessary condition for both economic and social development North Korea and the Geopolitics of Development Kevin Gray,Jong-Woon

Lee,2021-04-15 Gray and Lee focus on three geopolitical moments that have been crucial to the shaping of the North Korean system colonialism the Cold War and the rise of China to examine how the emergence and subsequent development of the North Korean political economy was fundamentally shaped by broader processes of geopolitical contestation

Globalisation and Local Conflicts in Africa and Asia Yukiko Nishikawa,2022-03-21 This edited book is written by six authors from Asia and Africa The individual authors focus on their own country s case or cases that they have been working on The book features local conflicts in six countries in Asia and Africa and identifies how the local conflicts are affected by the forces of globalization Cases include Nigeria s oil related conflicts the Democratic Republic of Congo s timber conflicts continuing instability in Mozambique Thailand s conflict with regard to AIDS medicine Myanmar s local conflicts after its reforms and the Afghanistan s conflicts over minerals From these diverse case studies the book examines how globalization and international politics affect local politics and conflicts and vice versa Even seemingly internal conflicts are shown to be significantly influenced by globalization forces and to create new dynamism in local politics While there are other books that

explore globalization and conflicts many of them are conceptually organized with a small number of case studies The present volume examines local conflicts in relation to globalization and demonstrates how structural inequality vis a vis weak stateness and statehood are significantly affected by global political economy **Development and Society**, 2004

Growing Apart Peter Lewis, 2007-04-17 *Growing Apart* is an important and distinguished contribution to the literature on the political economy of development Indonesia and Nigeria have long presented one of the most natural opportunities for comparative study Peter Lewis one of America's best scholars of Nigeria has produced the definitive treatment of their divergent development paths In the process he tells us much theoretically about when why and how political institutions shape economic growth Larry Diamond Senior Fellow Hoover Institution *Growing Apart* is a careful and sophisticated analysis of the political factors that have shaped the economic fortunes of Indonesia and Nigeria Both scholars and policymakers will benefit from this book's valuable insights Michael L Ross Associate Professor of Political Science Chair of International Development Studies UCLA Lewis presents an extraordinarily well documented comparative case study of two countries with a great deal in common and yet with remarkably different postcolonial histories His approach is a welcome departure from currently fashionable attempts to explain development using large multi country databases packed with often dubious measures of various aspects of governance Ross H McLeod Editor *Bulletin of Indonesian Economic Studies* This is a highly readable and important book Peter Lewis provides us with both a compelling institutionalist analysis of economic development performance and a very insightful comparative account of the political economies of two highly complex developing countries Nigeria and Indonesia His well informed account generates interesting findings by focusing on the ability of leaders in both countries to make credible commitments to the private sector and assemble pro growth coalitions This kind of cross regional political economy is often advocated in the profession but actually quite rare because it is so hard to do well Lewis's book will set the standard for a long time Nicolas van de Walle John S Knight Professor of International Studies Cornell University Peter M Lewis is Associate Professor and Director of the African Studies Program Johns Hopkins University School of Advanced International Studies *Outlook* California.
