Recent Advances and the Future Generation of Neuroinformatics Infrastructure Xi Cheng,Daniel R. Weinberger,Daniel Marcus,John Van Horn,Venkata Satyanand Mattay,Qian Luo,2015-12-11 The huge volume of multi modal neuroimaging data across different neuroscience communities has posed a daunting challenge to traditional methods of data sharing data archiving data processing and data analysis Neuroinformatics plays a crucial role in creating advanced methodologies and tools for the handling of varied and heterogeneous datasets in order to better understand the structure and function of the brain These tools and methodologies not only enhance data collection analysis integration interpretation modeling and dissemination of data but also promote data sharing and collaboration This Neuroinformatics Research Topic aims to summarize the state of art of the current achievements and explores the directions for the future generation of neuroinformatics infrastructure The

publications present solutions for data archiving data processing and workflow data mining and system integration methodologies Some of the systems presented are large in scale geographically distributed and already have a well established user community Some discuss opportunities and methodologies that facilitate large scale parallel data processing tasks under a heterogeneous computational environment We wish to stimulate on going discussions at the level of the neuroinformatics infrastructure including the common challenges new technologies of maximum benefit key features of next generation infrastructure etc We have asked leading research groups from different research areas of neuroscience neuroimaging to provide their thoughts on the development of a state of the art and highly efficient neuroinformatics infrastructure Such discussions will inspire and help guide the development of a state of the art highly efficient neuroinformatics infrastructure

Tropical Agriculture ,1928 *New Advances in Statistics and Data Science* Ding-Geng Chen,Zhezhen Jin,Gang Li,Yi Li,Aiyi Liu,Yichuan Zhao,2018-01-17 This book is comprised of the presentations delivered at the 25th ICSA Applied Statistics Symposium held at the Hyatt Regency Atlanta on June 12 15 2016 This symposium attracted more than 700 statisticians and data scientists working in academia government and industry from all over the world The theme of this conference was the Challenge of Big Data and Applications of Statistics in recognition of the advent of big data era and the symposium offered opportunities for learning receiving inspirations from old research ideas and for developing new ones and for promoting further research collaborations in the data sciences The invited contributions addressed rich topics closely related to big data analysis in the data sciences reflecting recent advances and major challenges in statistics business statistics and biostatistics Subsequently the six editors selected 19 high quality presentations and invited the speakers to prepare full chapters for this book which showcases new methods in statistics and data sciences emerging theories and case applications from statistics data science and interdisciplinary fields The topics covered in the book are timely and have great impact on data sciences identifying important directions for future research promoting advanced statistical methods in big data science and facilitating future collaborations across disciplines and between theory and practice
