Statistical Methods In Control And Signal Processing:

Statistical Methods in Control & Signal Processing Tohru Katayama, Suelo Sugimoto, 2018-10-08 Presenting statistical and stochastic methods for the analysis and design of technological systems in engineering and applied areas this work documents developments in statistical modelling identification estimation and signal processing The book covers such topics as subspace methods stochastic realization state space modelling and identification and parameter estimation Subspace Methods for System Identification Tohru Katayama, 2005-06-15 An in depth introduction to subspace methods for system identification in discrete time linear systems thoroughly augmented with advanced and novel results this text is structured into three parts Part I deals with the mathematical preliminaries numerical linear algebra system theory stochastic processes and Kalman filtering Part II explains realization theory as applied to subspace identification Stochastic realization results based on spectral factorization and Riccati equations and on canonical correlation analysis for stationary processes are included Part III demonstrates the closed loop application of subspace identification methods Subspace Methods for System Identification is an excellent reference for researchers and a useful text for tutors and graduate students involved in control and signal processing courses It can be used for self study and will be of interest to applied scientists or engineers wishing to use advanced methods in modeling and identification of complex systems *Stochastic Signal Processing* Johann Frederic Böhme, Pei-Jung Chung, 2012 This book intends to provide graduate students in electrical and information science a solid background in stochastic signal processing Chapter one introduces random signals through measurement noise Chapter two develops fundamental concepts in probability theory and statistical methods Chapter three is devoted to stochastic processes stochastic system theory and statistical signal processing The examples are carefully selected Some of them are aimed at motivating students interested in advanced topics such as signal detection estimation spectral analysis and system identification Problems with solutions and MATLAB exercises are included to encourage self study by researchers or engineers in related areas The most important concepts in statistics are presented so that linear systems and nonlinear ones as rectifiers with random input and output signals have proper mathematical description and allow statistical inference Such systems are fundamental to many engineering areas for example electronics measurements communications and control

Chonavel,2002-03-22 The only book on the subject at this level this is a well written formalised and concise presentation of the basis of statistical signal processing It teaches a wide variety of techniques demonstrating how they can be applied to many different situations *Statistical Signal Processing* Swagata Nandi,Debasis Kundu,2020-08-21 This book introduces readers to various signal processing models that have been used in analyzing periodic data and discusses the statistical and computational methods involved Signal processing can broadly be considered to be the recovery of information from physical observations The received signals are usually disturbed by thermal electrical atmospheric or intentional interferences and due to their random nature statistical techniques play an important role in their analysis Statistics is also used in the

formulation of appropriate models to describe the behavior of systems the development of appropriate techniques for estimation of model parameters and the assessment of the model performances Analyzing different real world data sets to illustrate how different models can be used in practice and highlighting open problems for future research the book is a valuable resource for senior undergraduate and graduate students specializing in mathematics or statistics **Automatic and Remote Control** International Federation of Automatic Control.
