Temporal Control of Drug Delivery William Hrushesky, Robert S. Langer, Felix Theeuwes, 1991 **Temporal Control of Drug Delivery (Annals of the New York Academy of Sciences, Volume 618)**. William J. Hrushesky, Robert Langer, Felix Theeuwes, NEW YORK ACADEMY OF SCIENCES NY., 1990 Revolution has occurred periodically for millennia across the cultural faces of medicine Some have focused upon a single therapy perfected and applied it more and more broadly until its use attained ceremonial and even religious significance Others have provided broad frameworks from which physiology and the balance between health and disease could be better understood The recognition of contagion the generalization of the idea of evolution and natural selection and the understanding of heritability have each had revolutionary biomedical consequences Each of these revolutionary concepts has had more than a century to impact medicine *Handbook of Nanophysics* Klaus D. Sattler, 2010-09-17 The tools of nanodiagnosics nanotherapy and nanorobotics are expected to revolutionize the future of medicine leading to presymptomatic diagnosis of disease highly effective targeted treatment therapy and minimum side effects Handbook of Nanophysics Nanomedicine and Nanorobotics presents an up to date overview of the application of nan Smart Micro- and Nanomaterials for Drug Delivery Ajit Behera, Arpan Kumar Nayak, Ranjan Kumar Mohapatra, Ali Ahmed Rabaan, 2024-08-27 Smart drug delivery at both the micro and nanoscale is an evolving field with numerous potential applications It has the potential to revolutionize drug therapy by making treatments more effective reducing side effects and improving patient outcomes This book presents a comprehensive review of the most recent studies on smart micro and nanomaterials with a focus on their smart activity for formation of targeted and responsive drug delivery carriers This volume Introduces readers to the fundamentals of these the micro and nanoscale materials as well as approaches to smart drug delivery and drug delivery systems Covers polymers metals and composite materials as well as quantum dots and carbon nanotubes Describes of all possible stimulated systems for drug delivery such as enzyme responsive small molecules responsive thermo responsive pH responsive electric field responsive magnetic field responsive light responsive ultrasound responsive and reductive environment responsive Offers a critical perspective on the future scope of smart drug delivery systems This reference work is written to support researchers in the fields of materials engineering and biotechnology with the goal of improving the diagnosis and treatment of disease and patient quality of life **Synthesis of Cannabinoid Ligands** Thomas Hurrle , 2018-10-26 Since the discovery of the endocannabinoid system cannabis and cannabinoids have received renewed attention The elucidation of the biochemical machinery responsible for cannabinoid effects has led to the identification of several targets that can be addressed by cannabinoid analogs The most prominent targets are the cannabinoid receptors CB1 and CB2 The endocannabinoid system acts as a versatile regulating system found in mammals that is involved in a broad range of physiological and neuronal processes Accordingly cannabinoid ligands have been proposed for the treatment of a large number of diseases and symptoms including cancer multiple

sclerosis and AIDS In the present thesis several strategies to address the endocannabinoid system were pursued Besides the synthesis of well over a hundred potentially active new compounds based on the lead structure of the potent cannabinoid analogs 3 benzylcoumarins a formal total synthesis of tetrahydrocannabinol THC via an DIELS ALDER reaction was concluded Additionally some of the most potent compounds from preceding work have been encapsulated in micro and nanoparticulate carrier systems The particles were capable to release their cannabinoid payloads over hours days weeks and even months The described microparticulate carrier systems should be able to generate site specific and long term stable drug levels
