The Commitment Factor:

The Commitment Factor Book Great Performance, Incorporated, 1994-02 **Multiple Commitments in the Workplace** Aaron Cohen, 2003-10-17 The concept of commitment in the workplace has attracted the attention of academics and practitioners for decades. The book will be 1 of the 1st on the idea of being committed to multiple foci in the workplace. Areas such as job satisfaction, union issues, organizational settings are covered. *International Journal of Strategic Organization and Behavioural Science: Vol.2, No.1* , *Advances in Human Factors, Business Management and Society* Jussi Ilari Kantola, Salman Nazir, Tibor Barath, 2018-06-26 This book presents practical approaches for facilitating the achievement of excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. Discussing ontologies, intelligent management systems, methods for creating knowledge and value added, it offers novel insights into time management and operations optimization, as well as advanced methods for evaluating customer satisfaction and conscious experience. Based on two conferences: the AHFE 2018 International Conference on Human Factors Business Management and Society and the AHFE 2018 International Conference on Human Factors in Management and Leadership held on July 21-25, 2018 in Orlando, Florida, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities. Researchers in education from eight countries: the UK, Estonia, France, Germany, the Netherlands, the Russian Federation, Norway, and Spain studied how young Europeans of different religious, cultural, and political backgrounds could engage in dialogue in the context of the school. Empirical studies conducted with 14-16 year old students included them offering their own perspectives and analyses of teaching and learning in both dialogue and conflict situations. Although there were some different national patterns and trends, most students wished for peaceful coexistence across differences and believed this to be possible. The majority agreed that peaceful coexistence depended on knowledge about each other's religions and worldviews, sharing common interests and doing things together. The project found that students who learn about religious diversity in school are more willing to discuss religions and beliefs with students of other backgrounds than those who do not. The international range of expert contributors to this book evaluate the results of the REDCo project, providing examples of its qualitative and quantitative studies and reflecting on the methods and theory used in the project as a whole.
