Hannah decided she needed to control her appetite and went on a diet for the first time. She successfully shed 10 pounds (4.5 kilograms) and was proud of her loss even though none of her friends seemed to notice. I didn't let it show, but I was hurt. They paid attention to other more expressive people even commented on how skinny other girls were. It made me feel invisible. Even though Hannah was attractive and popular, the distorted image she had of her own body helped her along the path toward an eating disorder. She is one of several teenagers you will meet in this book who resorted to dieting, starvation, and bingeing and purging to control their weight. Because of pressures from family, friends, coaches, and others, not to mention those applied by society itself that to be successful and attractive you must have a certain body type, teens like Hannah are susceptible to the development of eating disorders. This book clearly outlines the various disorders and explores the warning signs of their onset as well as how they are diagnosed and treated. It also helps clarify who is at risk and suggests why this may be so. Eating disorders are a serious manifestation of the real pressures that young people feel every day. The good news is that with knowledge, awareness, and treatment appropriate to each young person, a healthy relationship with food and a healthy way of life can be reclaimed.
