The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns. Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities. In *The Phenomenon of Life* the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture. With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region. He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built. Alexander argues that living structure is at once both personal and structural. Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart. A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united. Fatal Pauses Stuart C.

Yudofsky, 2015-04-01 People can become stuck in many ways and for a wide variety of reasons explains the author of *Fatal Pauses* that rare book that both clinicians and general readers can benefit from and enjoy. Novelistic in its depictions of composite patients but clear eyed in its analysis the book offers a 3 D method of addressing stuckness which is defined as not stopping something that is bad for us or not starting and staying with something that is good for us. The process of discovering why one is stuck deciding to become unstuck and then asserting the discipline required to do so is brought to vivid life by one of the most respected psychiatrists of our day. The book's structure is logical and engaging. The *Am I Stuck* Scale can be self administered by general readers or administered by clinicians to their patients. This first chapter sets the stage for what follows. The 3 D method of getting unstuck is presented in a systematic easy to comprehend manner that begins with a brief overview and proceeds to more detailed instructions and insights. Riveting case examples make up the heart of the book. They are not mere summaries but consist of thorough and detailed clinical descriptions that provide context in addition to extensive dialogue and analysis. Several of these cases are divided into multiple chapters providing a comprehensive clinical picture to help both mental health professionals and lay readers increase their understanding of being stuck. A range of categories or stuckness is addressed including being trapped by career choices limited by obesity paralyzed by an unsatisfying marriage incapacitated by addiction and imprisoned by the need to please. Of special note is the case

example of a young man whose interpersonal relationships have gradually but progressively become reduced to computer based encounters The author s examination of this individual s fixation on video games and virtual realities and his escape from this cyberprison through treatment is both timely and compelling Finally the author provides an evolutionary and neurobiological overview of how we become stuck which helps the reader grasp the underpinnings of this behavior and learn how to become unstuck Written in a warm and disarming style Fatal Pauses will find a home in clinicians libraries waiting rooms and on family room bookshelves something to food about Questlove, Ben Greenman, 2016-04-12 In somethingtofoodabout drummer producer musical director culinary entrepreneur and New York Times bestselling author Questlove applies his boundless curiosity to the world of food In conversations with ten innovative chefs in America Questlove explores what makes their creativity tick how they see the world through their cooking and how their cooking teaches them to see the world The conversations begin with food but they end wherever food takes them Food is fuel Food is culture Food is history And food is food for thought Featuring conversations with Nathan Myhrvold Modernist Cuisine Lab Seattle Daniel Humm Eleven Madison Park and NoMad NYC Michael Solomonov Zahav Philadelphia Ludo Lefebvre Trois Mec L A Dave Beran Next Chicago Donald Link Cochon New Orleans Dominique Crenn Atelier Crenn San Francisco Daniel Patterson Coi and Loco l San Francisco Jesse Griffiths Dai Due Austin and Ryan Roadhouse Nodoguro Portland The Sun of Wisdom Khenpo Tsultrim Gyamtso, 2003-03-11 The Fundamental Wisdom of the Middle Way was written in the second century and is one of the most important works of Nagarjuna the pioneering commentator on the Buddha s teachings on the Madhyamika or Middle Way view The subtle analyses presented in this treatise were closely studied and commented upon by many realized masters from the Indo Tibetan Buddhist tradition Using Nagarjuna s root text and the great modern master Ju Mipham s commentary as a framework Khenpo Tsultrim Gyamtso explains the most important verse from each chapter in the text in a style that illuminates for modern students both the meaning of these profound teachings and how to put them into practice in a way that benefits both oneself and others **Dumbing Down** Katharine Washburn, John F.
