Thinking Through the Principalship Dianne E. Ashby, Samuel E. Krug, 1998 **An Historical Analysis of the Development of Thinking in the Principal Writings of Malcolm Knowles** George William Henry, 2009 Malcolm Shepherd Knowles was a key writer and theorist in the field of adult education in the United States He died in 1997 and left a large legacy of books and journal articles This thesis traced the development of his thinking over the 46 year period from 1950 to 1995 It examined the 25 works authored co authored edited reissued and revised by him during that period The writings were scrutinised using a literature research methodology to expose the theoretical content and a history of thought lens to identify and account for the development of major ideas The methodology enabled a gradual unfolding of the history A broadly consistent and sequential pattern of thought focusing on the notion of andragogy emerged The study revealed that after the initial phases of exploratory thinking Knowles developed a practical theoretical framework he believed could function as a comprehensive theory of adult learning As his thinking progressed his theory developed into a unified framework for human resource development and later into a model for the development of self directed lifelong learners The study traced the development of Knowles thinking through the phases of thought identified the writings that belonged within each phase and produced a series of diagrammatic representations showing the evolution of his conceptual framework The production of a history of the development of Knowles thought is the major outcome of the study In addition to plotting the narrative sequence of thought events the history helps to explicate the factors and conditions that influenced Knowles thinking and to show the interrelationships between ideas The study should help practitioners in their use and appreciation of Knowles works The Principalship Thomas J. Sergiovanni, 2006 0205457231 Sergiovanni The Principalship 5e The Principalship focuses on how school leadership is based on reflective practice and moral authority This book continues to emphasize school culture standards building community and providing a moral basis for leadership as a means of navigating through contextual issues and constraints that principals routinely face This edition aims to inform future principals about the decisions they will make about their practice and how those decisions will affect students and teachers Extensively updated with new emphasis given to diversity as a part of community building school character as an important ingredient in school effectiveness new definitions of school effectiveness and a new view of the process of change The book s trademark emphasis on reflective practice is maintained and opportunities for reflection are provided throughout the book The link between organizational character and school effectiveness is explored and emphasis is given to how organizational character can be established and maintained Beginning the Principalship John C.
