Toward More Humanistic Instruction:

Toward More Humanistic Instruction John A. Zahorik, Dale L. Brubaker, 1972 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1974 **A Coherent Curriculum for Every Student** Edmund C. Short, 2019-10-11 This book exhibits a collection of proposals for how school curriculum may be conceived, designed, and realized. These proposals are drawn from writers both past and present who have presented some particular vision of what curriculum could be like for Pre K-12 schools and have sought to convince others to adopt their proposal for use in some actual school situation. The proposals differ from one another in a variety of ways including in their purposes, their contents, and their perspectives, and thus pose a wealth of options for consideration by those who are planning to change their school curriculum to something new and more suitable for their particular clientele. Readers will need to weigh the appeal of various proposals presented here against criteria they have for locating an optimum model for their particular situation. The proposals selected for inclusion in this book address the whole of the curriculum, all levels, all subjects, all age groups; they deal with entire program change rather than with incidental changes in content, program arrangements, teaching approaches, or other limited alterations. This book is intended to be a useful resource for those responsible for making decisions in a particular school or school district or at a broader policy-making level about what the entire curriculum should be and should include. It draws attention to the work of many thoughtful persons who have dealt with the issue of what a coherent curriculum might be like and who, in some instances, have set up actual programs based on their ideas.

Teaching and Learning English in Non-English-Speaking Countries Shahnaz Shoro, 2019-01-29 The English language is currently used as a second or foreign language in those countries which had once been British colonies. For example, when united India was partitioned into two main countries, India and Pakistan, it was intended that English would gradually be replaced as the language of administration in both countries. However, as the countries were also home to several regional languages, attempts to introduce a sole official language and abolish English as the second official language have never succeeded. In today's world, English is the language of the cultural, social, and political elite, offering significant economic, political, and social advantages to fluent speakers. Speakers of the English language automatically enjoy greater social status and have easier access to positions of power and influence. Learning and teaching the English language has therefore become a concern for those who cannot afford to study in native-speaking countries or at local, expensive English-medium schools. This book provides various government and non-government educational and professional institutions with simple and practical language learning courses which fulfil the requirements of people who want to learn English. It will be of great interest to a wide variety of readers, including teachers, language learners, students, linguistic departments, general readers who are struggling to learn English, and professionals who want to overcome the language barrier.
