Ultra And Mediterranean Strategy:

Ultra and Mediterranean Strategy 1941-1945 Ralph Francis Bennett, 1989 Efterretningsvirksomhed ang ende Middelhavsomr det Libyen Rommels tilbagetog Tunis Sicilien Jugoslavien Appendiks I XIV **Ultra and Mediterranean Strategy** Ralph Francis Bennett, 1989 Written by a man who was personally involved in handling the German Enigma decrypts from their first decodings until the end of World War II this book reveals how Ultra secret information on German plans and operations was used to thwart Hitler s ambitions **Intelligence and Strategy** John Ferris, 2007-05-07 John Ferris work in strategic and intelligence history is widely praised for its originality and the breadth of its research At last his major pioneering articles are now available in this one single volume In *Intelligence and Strategy* these essential articles have been fundamentally revised to incorporate new evidence and information withheld by governments when they were first published This volume reshapes the study of communications intelligence by tracing Britain s development of cipher machines providing the context to Ultra and Enigma and by explaining how British and German signals intelligence shaped the desert war The author also explains how intelligence affected British strategy and diplomacy from 1874 to 1940 and world diplomacy during the 1930s and the Second World War Finally he traces the roots for contemporary intelligence and analyzes intelligence and the RMA as well as the role of intelligence in the 2003 Gulf War This volume ultimately brings new light to our understanding of the relations between intelligence strategy and diplomacy between the end of the 19th century and the beginning of the 21st century **Decisive Campaigns of the Second World War** John Gooch, 2012-11-12 Success or defeat in the Second World War turned less on winning or losing battles than on winning or losing campaigns This volume reassesses the importance of seven major campaigns for the outcome of the war The authors examine a wide range of factors which influence success or failure including strategic planning logistics combat performance command and military intelligence This book represents a novel contribution to the study of the Second World War **MacArthur's ULTRA** Edward J. Drea, 1992 Cracking the enemy s radio code is a task so urgent and so difficult that it demands the military s best minds and most sophisticated technology But when the coded messages are in a language as complex as Japanese decoding problems multiply dramatically **From Axis Victories to the Turn of the Tide** Alan Levine, 2012-06-01 Analyzes the most critical campaigns of World War II from 1942 to 1943 examining the conflict from a geographical perspective and discussing the key developments that turned the tides of war in favor of the Allied powers *Military Review*, 2002 **The Basis and Making of British Grand Strategy, 1940-1943** Brian Padair Farrell, 1998 **The War Against Rommel's Supply Lines, 1942-1943** Alan Levine, 1999-06-30 An exciting account of a little known yet vital part of World War II the Allied effort to blockade Axis forces in North Africa with a relatively small number of planes and submarines included some of the war s most spectacular air battles and opened the way to the attack on Fortress Europe from the south This is the first book length treatment of the crucial struggle to cut Axis supply lines in the Tunisian campaign of 1942 1943 a battle often ignored or

played down even by official historians The campaign marked the first big U S victory against the Axis powers and served as a proving ground for several top Allied commanders This study fills an important gap in the history of the war reevaluating the development of Allied airpower and the role of Italy in the campaign Allied success in interdiction was a critical factor in the greatest Allied victory in the Mediterranean campaign a victory which left the enemy so weakened that it could not stop the subsequent invasion of Europe from the south Despite initial disorganization and early disappointments the British waged one of only two successful submarine campaigns ever fought This study describes some of the war s most amazing air battles notably Operation Flax against the enemy s air transport fleet and attacks on convoys all interwoven with the events of the ground war in the desert and comparisons with the Pacific effort It details the struggle to reorganize and improve the Allied effort the belated success of sea sweeps against enemy ships and the final victory in the spring of 1943 in which an air blockade was clamped on the sea and sky approaches to Tunisia *Naval War College Review* ,2014 *British and American Approaches to Intelligence* Ken G. Robertson,1987 **Living with the Enigma Secret** Jan Stanisław Ciechanowski,2005 **American Intelligence, 1775-1990** Neal H. Petersen,1992 **The World War II Databook** John Ellis,1993 Providing a comprehensive and authoritative summary of all the available facts and figures relating to World War II this text is divided into nine sections for ease of reference *The British Army and Signals Intelligence During the First World War* John Ferris,1992 Historians have paid little attention to the British Army s experience with signals intelligence during the First World War However this was one of the Army s most important sources of information about crucial matters such as the order of battle and intentions of the German and Turkish Armies Britain s successes and failures in signals intelligence profoundly affected battles ranging from the race for the Channel Ports first Somme third Gaza and Amiens among many others While efforts to weed the records on these topics have created major gaps in the sources surviving evidence throws an entirely new light on the British Army in the Great War It allows one to trace the evolution of the Army s signals intelligence organisations to determine many of their successes and failures to show how this intelligence affected various operations and indeed to demonstrate that signals intelligence influenced the operations of the British Army as much as those of the Royal Navy The material reproduced in this volume includes excerpts from reports by Army Headquarters in France Italy and Mesopotamia and the Military Intelligence Directorate It includes the memorandum Enemy Codes and their Solution by the G H Q codebreaking section in January 1918 which is one of the two best sources known to exist about the techniques of codebreaking surviving reports on the enemy radio networks in the Balkans and Anatolian Turkey which are the most illuminating evidence from any theatre on the approach toward traffic analysis and a report on the breaking of German and Turkish Army ciphers in Mesopotamia during 1917 which is the best source known about the techniques of cryptanalysis used by an Army in the Great War BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Journal of Librarianship and Information Science* ,2007 *Contemporary British History, 1931-1961*
