Simulations Jean Baudrillard, 1983 Baudrillard s bewildering thesis a bold extrapolation on Ferdinand de Saussure s general theory of general linguistics is in fact a clinical vision of contemporary consumer societies where signs don t refer anymore to anything except themselves They all are generated by the matrix

Simulations never existed as a book before it was translated into English. Actually, it came from two different book covers written at different times by Jean Baudrillard. The first part of Simulations and most provocative because it made a fiction of theory was *The Procession of Simulacra*. It had first been published in *Simulacre et Simulations* 1981. The second part, written much earlier and in a more academic mode, came from *L'Échange Symbolique et la Mort* 1977. It was a half earnest, half parodical attempt to historicize his own conceit by providing it with some kind of genealogy of the three orders of appearance: the Counterfeit attached to the classical period, Production for the industrial era, and Simulation controlled by the code. It was Baudrillard's version of Foucault's *Order of Things* and his ironical commentary of the history of truth. The book opens on a quote from Ecclesiastes asserting flatly that the simulacrum is true. It was certainly true in Baudrillard's book but otherwise apocryphal. One of the most influential essays of the 20th century, Simulations was put together in 1983 in order to be published as the first little black book of *Semiotext(e)*'s new Foreign Agents Series. Baudrillard's bewildering thesis, a bold extrapolation on Ferdinand de Saussure's general theory of general linguistics, was in fact a clinical vision of contemporary consumer societies where signs don't refer anymore to anything except themselves. They all are generated by the matrix. In effect, Baudrillard's essay quickly became a must to read both in the art world and in academe, was upholding the only reality there was in a world that keeps hiding the fact that it has none. Simulacrum is its own pure simulacrum and the simulacrum is true. In his celebrated analysis of Disneyland, Baudrillard demonstrates that its childish imaginary is neither true nor false; it is there to make us believe that the rest of America is real when in fact America is a Disneyland. It is of the order of the hyper real and of simulation. Few people at the time realized that Baudrillard's simulacrum itself wasn't a thing but a deterrence machine just like Disneyland meant to reveal the fact that the real is no longer real and illusion no longer possible. But the more impossible the illusion of reality becomes, the more impossible it is to separate true from false and the real from its artificial resurrection; the more panic-stricken the production of the real is.

Utopia Deferred Jean Baudrillard, 2006-08-25. Seminal essays written by Baudrillard for a journal devoted to a radical leftist critique of architecture, urbanism, and everyday life. The Utopie group was born in 1966 at Henri Lefebvre's house in the Pyrenees. The eponymous journal, edited by Hubert Tonka, brought together sociologists Jean Baudrillard, Ren Lourau, and Catherine Cot, architects Jean Aubert, Jean Paul Jungmann, Antoine Stinco, and landscape architect Isabelle Auricoste. Over the next decade, both in theory and in practice, the group articulated a radical ultra-leftist critique of architecture, urbanism, and everyday life. *Utopia Deferred* collects all of the essays Jean Baudrillard published in *Utopie*, as well as recent interviews with Jean Baudrillard and Hubert Tonka. *Utopie* served as a workshop for Baudrillard's thought. Many of the essays he first published in *Utopie* were seminal for some of his most shockingly original books: *For a Critique of the Political Economy of the Sign*, *The Mirror of Production*, *Simulations*, *Symbolic Exchange and Death*, and *In the Shadow of the Silent Majorities*. But *Utopie* was also a topical journal and a political one; the topics of these essays are often torn from the headlines of the tumultuous decade.
