Nascimento-e-Silva**

Framework Circular Economy:

Green Circular Economy Pardeep Singh, Anamika Yadav, Indranil Chowdhury, Ravindra Pratap Singh, 2023-10-12 This book highlights the concepts issues and policies related to the circular economy The chapters of this book are designed to include the theoretical approach to the green circular economy sustainable supply chain and challenges in the green circular economy The book is a step towards designing sustainable circular economy embedded production and management practices This book also addresses the capability of green lean productions and a circular economy to improve resource efficiency and address environmental sustainability issues Environmental sustainability is a hot topic in politics science and industry There is a need to achieve economic social and environmental sustainability goals through adaptations of the green circular economy which can help minimize greenhouse gas emissions toxic pollutant releases waste and energy and resource usage by employing renewable energy concepts and recyclable materials The production processes must be resource efficient and environmentally friendly including green lean manufacturing Adopting a circular economy in manufacturing is less evident than green lean management However systematic strategies to bridge this gap have yet to be devised There is an urgent need to fully explore the Circular Economy concept to attain resource and environmental goals for the sustainability of the environment in the present era of global climate change Its framework s powerful strategies need to solve the problem created by linear economic growth through industrialization and gross economic growth There is a need to improve the sustainability management capabilities in the manufacturing and industrial sector to support the circular economy and a need to examine the impact of green human resource management This book proposes the combined approach of green lean solutions and a green circular economy Through this book we try to produce the content and information in a compiled form to give the audience an understanding of the circular economy concept framework and challenges

Circular Economy ,2018 In a circular economy waste generation is minimised and the value of products materials and resources is maintained for as long as possible It is a new economic model that offers tremendous opportunities It helps save natural resources combats climate change makes production consumption and waste management more sustainable and creates green local jobs To stimulate the transition towards this new model the European Commission released a circular economy action plan in December 2015 Two years on one of its last milestones a framework for monitoring progress has just been adopted Tracking progress is not easy as this transition is taking place in many different areas But the monitoring framework is an important tool showing how the various elements of the circular economy are beginning to mature It will help citizens and policymakers identify success factors and show where more action is needed The results will help set new priorities as Europe moves towards its long term aim a more circular economy

Sustainable Products in the Circular Economy Magdalena Wojnarowska, Marek Ćwiklicki, Carlo Ingraio, 2022-04-24 This book explores how the circular economy influences product design in today s business and society Drawing on contributions from a wide

range of expert thinkers this volume assesses the existing approaches strategies and tools which facilitate socially and environmentally responsible production and consumption systems It then goes on to highlight the ways in which the circular economy conceptual framework could be implemented effectively at both micro product policy and macro sustainable consumption levels in order to alter the industrial landscape and increase its interconnectedness with materials and scarce resources Highlighting the pros and cons of transitioning to this new model the book also cautions that it will only be made possible via significant behavior change at both industry and consumer levels Sustainable Products in the Circular Economy will be of great interest to students and scholars of sustainable manufacturing sustainable consumption corporate social responsibility and business ethics It will also be relevant to industry professionals whose work dovetails with these areas

Sustainable Smart Cities and the Future of Urban Development Al-Humairi, Safaa Najah Saud,Hajamydeen, Asif Iqbal,Mahfoudh, Asmaa,2024-12-05 As global urbanization continues to accelerate smart cities emerge as a strategy to address the complexities of modern urban life These cities invest in human and social capital communication infrastructure and technology to drive sustainable economic growth and ensure a high quality of life Participatory governance plays a crucial role in managing natural and man made resources effectively Driven by a growing global population and a pressing need to address environmental concerns the concept of a smart city has emerged as a potential solution Sustainable Smart Cities and the Future of Urban Development delves into the exciting intersection of sustainable development and smart city technologies exploring how these forces can be harnessed to shape a more livable and resilient future for our urban environments Through a multidisciplinary lens this book explores the concept of sustainable smart cities by elucidating their fundamental characteristics and components Covering topics such as artificial intelligence AI renewable energy and waste management this book is an excellent resource for urban planners architects technology developers innovators community leaders industry professionals academicians researchers and more

The Routledge Handbook of Global Sustainability Education and Thinking for the 21st Century Michele John,2025-02-20 This Handbook emerges as a pivotal resource in underscoring the important role of sustainability education in catalysing a global shift toward sustainable development It articulates the need for a profound transformation within institutional leadership and educational frameworks to support the critical global sustainability transition This Handbook explores sustainability thinking as a critical paradigm shift in confronting the multifaceted challenges of sustainable development It presents an urgent case for a systemic overhaul in our approach to education in the 21st century advocating for multidisciplinary education and holistic systems thinking in order to more successfully navigate the complexities of sustainable development The text discusses the foundational elements of modern sustainability thought and management including the significance of values ethics governance and the pressing issues of environmental degradation and climate change It offers an extensive trans disciplinary overview of sustainability discourse spanning a broad array of perspectives on sustainability management and education It provides a comprehensive

introduction to the language of sustainability and a detailed examination of sustainability issues highlighting their implications for education training and management development It addresses urgent global issues such as decarbonisation resource scarcity population dynamics pollution and land degradation emphasising the crucial role of educational initiatives in helping to mitigate these challenges This seminal work has been developed for a diverse audience including academics policymakers students and educators serving as a valuable tool for those wanting to comprehend complex global sustainability challenges and the paramount importance of education in supporting global sustainability in the 21st century

Circular Economy: Global Perspective Sadhan Kumar Ghosh,2019-11-01 A circular economy is an alternative to a traditional linear economy make use dispose in which we keep resources in use for as long as possible extract the maximum value from them whilst in use then recover and regenerate products and materials at the end of each service life Circular economy CE is important towards sustainable development resources circulation and conservation involving closing of material loops and cascading used resources to prevent waste occurrence and transforming the resulting residual streams into new secondary resources Strategies and legislative framework for waste management are important steps for development of a more CE where resource efficiency becomes the key driver for both economic growth and environmental protections A few countries achieved good results implementing CE as a replacement of the linear economy Resource managers and planners should thoroughly identify factors to implement CE for societal benefits This book presents how resource consumption is minimized with rational use based on 3Rs legislative framework and government supports towards implementing CE initiatives example of best practices future plans and targets in different countries those are helpful for researchers planners and implementers

Framework Proposal to Organize Sustainability Strategies Toward Transition to the Circular Economy Marcia Maria Bacovis,Daniel Nascimento-e-Silva,2020 This study aims to propose a framework to organize sustainability strategies from the Schools of Thought of circular economics to guide the introduce circularity in business models to meet the wishes of researchers and managers It used the bibliographic method to analyze scientific articles on circular economy level of analysis stock of knowledge on circular economy and perspective of diachronic analysis seeking to understand its evolution over time the data were organized with the aid of a synthesizer table where the characteristics of each school of thought were joined then interpreted with the content analysis technique seeking meaning for all terms cataloged in the same semantic field The strategies were organized in the stages of the technical cycle of the Systemic Diagram of the Ellen MacArthur Foundation EMF The conclusion shows that the structure created can guide the transition to an era of a more circular economy
