http://www.lis.qld.gov.au/biotechnology/bioindustries.htm#menu_top

The Queensland Biotechnology Directory showcases biotechnology organisations throughout the State. It provides an overview of the range of activities undertaken in the life sciences disciplines, with a particular emphasis on activities that have significant commercial and economic benefits.

Australia has a small, but strongly growing life sciences industry, driven by a strong research base, particularly in medical research and agriculture. In 1998, there were an estimated 120 core biotech companies with an estimated turnover of AUD\$665 million (US\$600 million). In addition there are a significant number of large corporations, such as breweries, food producers and miners involved in the development of technologies based on the life sciences.
