*The Tenacious Mars Effect* Suitbert Ertel, Kenneth Irving, 1996      [Skepticism and Humanism](#) Paul Kurtz, 2023-05-31 As we begin the third millennium there is cause for cautious optimism regarding the human prospect Democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis Paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre New Age media driven paranormal belief systems Also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness In *Skepticism and Humanism* Paul Kurtz locates these threatening developments within a long standing and largely unchallenged theological worldview He proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook An estimated 60 percent of scientists are atheists or agnostics However the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion At the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications *Skepticism and Humanism* attempts to meet this need It defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth It also defends scientific naturalism an evolutionary view of nature life and the human species Kurtz sees the dominant religious doctrines as drawn from an agricultural nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age At the same time he rejects postmodernism for abandoning science and embracing a form of nihilism There can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life *Skepticism and Humanism* shows how they can to foster democratic values and social prosperity The book will be important for philosophers scientists and all those concerned with contemporary issues      **Head and Heart** Victor Mansfield, 2002-07-01 This unusual book tells the story of an astrophysicist's search for meaning from psychological philosophical and spiritual points of view Mansfield weaves personal memoir with clear scientific discussion and quotes such famous thinkers and writers as Steven Weinberg Jane Goodall Joseph Campbell C G Jung Nelson Mandela Robert Frost and the Sufi poet Rumi In plain language Mansfield explores radio astronomy the nature of time relativity cosmological expansion and quantum mechanics with personal examples of meditation dreams and synchronicity to show that spiritual experience offers a fundamentally different window into reality than that given by science And he tackles these questions What is invisible matter Am I merely a complex tangle of atoms and molecules controlled by the laws of physics What is the nature of soul How is modern science a form of religion You will be charmed by Mansfield's anecdotes to dramatize his own struggles with such questions In a culture where the relationship between science and spirituality

continues to be strained he offers hope for a higher synthesis that embraces dissenting worldviews and encourages compassionate action in the world

**The Secrets of the Vaulted Sky** David Berlinski,2003 Explores the enigmatic world of astrology one of the oldest predictive arts Revealing its complexities and scientific merit *The Dawn of Astrology: The medieval and modern worlds* Nicholas Campion,2008 *Astrology: The only introduction you'll ever need (Principles of)* Charles Harvey,Suzi Harvey,2013-08-01 A comprehensive introduction to astrology that forms an ideal guide for anyone who reads their horoscope every day and wants to gain a deeper understanding of the subject but doesn't want anything too complex

**Children of the Sun God** Linda Tucker,2001

**The Paranormal** Hugh Montefiore,2002 The paranormal concerns happenings and experiences which defy rational or scientific explanation Most people believe that they occur but scientists tend to dismiss them as superstition and the churches seem frightened of them Experienced author Bishop Hugh Montefiore makes here a serious study of this fascinating subject Never averse to controversy he is not afraid to take on Professor Richard Dawkins the well known populariser of the natural sciences who dismisses the paranormal out of hand Here the subject is dealt with in a balanced and reasonable fashion He cites many cases giving reasons for and against accepting them as paranormal Suggesting criteria by which to judge them he leaves readers to make up their own minds until the last chapter where he gives his own conclusions He ranges more widely than previous books on the subject by including the paranormal in religion In the first part he examines alleged cases of telepathy precognition automatic writing mediums ghosts poltergeists and hauntings and even astrology In the second part he considers the paranormal in religion including near death experiences exorcism and reincarnation In the third part he examines specifically Christian experiences including visions and the extraordinary experiences of mystics He even suggests that the paranormal is to be found in the scriptures This remarkable book which includes interviews with those who have experienced the paranormal should prove to be irresistible reading
