Toward Genocide:

The Holocaust and Genocides in Europe Benjamin Lieberman, 2013-04-11 Focusing on the major cases of genocide in twentieth century Europe including the Armenian genocide the Holocaust and genocide in the former Yugoslavia as well as mass killing in the Soviet Union this book outlines the internal and external roots of genocide Internal causes lie in the rise of radical nationalism and the breakdown of old empires while external causes lie in the experience of mass violence in European colonial empires Such roots did not make any case of genocide inevitable but did create models for mass destruction The book enables students to assess the interplay between general causes of violence and the specific crises that accelerated moves towards radical genocidal policies Chapters on the major cases of twentieth century European genocide will each describe and analyse several key themes acts of genocide perpetrators victims and bystanders and genocide in particular regions Using the voices of the human actors in genocide often ignored or forgotten provides arresting new insights The conclusion frames European genocide in a global perspective giving students an entry point to discussion of genocide in other continents and historical periods

Modern Genocide Paul R. Bartrop, Steven Leonard Jacobs, 2014-12-17 This massive four volume work provides students with a close examination of 10 modern genocides enhanced by documents and introductions that provide additional historical and contemporary context for learning about and understanding these tragic events Modern Genocide The Definitive Resource and Document Collection spans nearly 1 700 pages presented in four volumes and includes more than 120 primary source documents making it ideal for high school and beginning college students studying modern genocide as part of a larger world history curriculum The coverage for each modern genocide from Herero to Darfur begins with an introductory essay that helps students conceptualize the conflict within an international context and enables them to better understand the complex role genocide has played in the modern world There are hundreds of entries on atrocities organizations individuals and other aspects of genocide each written to serve as a springboard to meaningful discussion and further research The coverage of each genocide includes an introductory overview an explanation of the causes consequences perpetrators victims and bystanders the international reaction a timeline of events an Analyze section that poses tough questions for readers to consider and provides scholarly pro and con responses to these historical conundrums and reference entries This integrated examination of genocides occurring in the modern era not only presents an unprecedented research tool on the subject but also challenges the readers to go back and examine other events historically and consequently consider important questions about human society in the present and the future

Protection Against Genocide Neal Riemer, 2000-03-30 Without succumbing to utopian fantasies or realistic pessimism Riemer and his contributors call for strengthening the key institutions of a global human rights regime developing an effective policy of prudent prevention of genocide working out a sagacious strategy of keenly targeted sanctions political economic military judicial and adopting a guiding philosophy of just humanitarian intervention They underscore significant

changes in the international system the end of the Cold War economic globalization the communications revolution that hold open the opportunity for significant if modest movement toward strengthening key institutions The essays explore key problems in working toward prevention of genocide They highlight the existence of considerable early warning of genocide and emphasize that the real problem is a lack of political will in key global institutions Sanctions especially economic sanctions may punish a genocidal regime but at the expense of innocent civilians Thus more clearly targeted sanctions are seen as essential The argument on behalf of a standing police force to deal with the crime of genocide as they show is powerful and controversial powerful because the need is persuasive controversial because political realists question its cost and political feasibility Implementing a philosophy of just humanitarian intervention requires an appreciation of the difficulties of interpreting those principles in difficult concrete situations A permanent international criminal tribunal to deter and punish genocide they argue will put into place a much needed component of a global human rights regime A thoughtful analysis for scholars and students of international politics and law and human rights in general *War* Cameron D. Lippard, Pavel Osinsky, Lon Strauss, 2018-02-13 *War Contemporary Perspectives on Armed Conflicts around the World* presents a broad variety of interdisciplinary and social scientific perspectives on the causes processes cultural representations and social consequences of the armed conflicts between and within nations and other politically organized communities This book provides theoretical views of armed conflict and its impact on people and institutions around the world *Encyclopedia of Genocide and Crimes Against Humanity* Dinah Shelton, 2005 This volume covering entries T Z presents information on those acts that fall within the definitions developed over the past century of crimes under international law war crimes genocide and crimes against humanity **We Charge Genocide** Civil Rights Congress (U.S.), 1952 **A World at Total War** Roger Chickering, Stig Förster, Bernd Greiner, German Historical Institute (Washington, D.C.), 2005 This volume presents the results of a conference on the history of total war **The Oxford Companion to American Military History**, **Congressional Record** United States. Congress, 1994 *Encyclopedia of Genocide and Crimes Against Humanity: I-S* Dinah Shelton, 2005 Presents an alphabetically arranged encyclopedia with over three hundred fifty entries depicting genocide and war crimes from ancient history through the twenty first century and includes information on the various individuals and groups that have been targeted courts and tribunals and various sorts of reparations *Prosecuting War Crimes and Genocide* Howard Ball, 1999 Combining history politics and critical analysis he revisits the killing fields of Cambodia documents the three month Hutu machete genocide of about 800 000 Tutsi villagers in Rwanda and casts recent headlines from Kosovo in the light of these other conflicts **BOOK JACKET** **Gendercide and Genocide** Adam Jones, 2004 The most wide ranging book ever published on gender selective mass killing or gendercide this collection of essays is also the first to explore systematically the targeting of non combatant battle age males in various wartime and peacetime contexts Representing such fields as sociology political science psychology queer studies and human

rights activism the contributors explore themes and issues outlined by editor Adam Jones in the book's opening essay In that article which provoked considerable debate when it was first published in 2000 Jones argues that throughout history and around the world the population group most consistently targeted for mass killing and state backed oppression are non combatant men of roughly fifteen to fifty five years of age Such males Jones contends are typically seen as the group posing the greatest danger to the conquering force Jones's article also examines the use of gendercide institutions such as female infanticide witch hunts military conscription and forced labor against both women and men The subsequent essays some original some drawn from a special issue of the Journal of Genocide Research and other sources expand diversify and criticize this framing of gendercide They range from a sophisticated theoretical analysis of gendercide to in depth treatments of such topics as the Rwandan genocide of 1994 the gendercide oppression of young African American males the predicament of gays and lesbians in the face of increasing biotechnological manipulation of human behavior and the psychology of shame and humiliation underlying gendercides against both sexes Still other articles take issue with Jones's theories of gendercide or explore how human rights organizations have defined documented and responded to gendercide and other sex specific atrocities A closing essay considers the relevance of feminist and men's studies literatures for the study of gendercide

Genocide Helen Fein, 1993 The current understanding of genocide's definition causation and prevention is summarized before this text ranges across the social sciences in its search for explanations and across the world for examples It provides a critical review which aims to advance beyond existing knowledge of genocide

The Genocide Studies Reader Samuel Totten, Paul Robert Bartrop, 2009 This thorough overview of all aspects of the field of genocide studies brings together for the first time classic and contemporary writings from some of the most noted scholars writing on genocide in the fields of genocide studies political science history and sociology The Reader covers key aspects of a host of complex and thorny issues such as the definition of genocide theories of genocide prevention and intervention and its denial This collection of writings is essential reading for anyone who wants to understand this most atrocious form of political violence that has plagued human history
