Digital Productivity Best:

Digitalization and Development Rajah Rasiah, Wah Yun Low, Nurliana Kamaruddin, 2023-01-31 This book examines the diffusion of digitalization and Industry 4.0 technologies in Malaysia by focusing on the ecosystem critical for its expansion. The chapters examine the digital proliferation in major sectors of agriculture, manufacturing, e-commerce, and services, as well as the intermediary organizations essential for the orderly performance of socioeconomic agents. The book incisively reviews policy instruments critical for the effective and orderly development of the embedding organizations and the regulatory framework needed to quicken the appropriation of socioeconomic synergies from digitalization and Industry 4.0 technologies. It highlights the importance of collaboration between government, academic, and industry partners, as well as makes key recommendations on how to encourage adoption of IR4.0 technologies in the short and long term. This book bridges the concepts and applications of digitalization and Industry 4.0 and will be a must-read for policy makers seeking to quicken the adoption of its technologies. Sustainable Development Aleksei V. Bogoviz, Alexander E. Suglobov, Alexander N. Maloletko, Olga V. Kaurova, 2021-12-03 This book presents a systematic view of the cooperative sector of the economy from the standpoint of sustainable development. On the one hand, the book reveals the consequences of business cooperation for the implementation of global sustainable development goals, primarily in terms of environmental protection and food security. On the other hand, the book defines the essence of sustainable development of the cooperative sector of the economy as a demonstrative economic practice that reflects the general state of socio-economic systems. Scientific, methodological, and applied recommendations for the systemic optimization of the management of the cooperative sector of the economy in the interests of simultaneously achieving its maximum positive impact on the implementation of sustainable development goals, as well as maintaining its stability, are proposed. The book contains the best works based on the results of the International Scientific and Practical Conference Cooperation and Sustainable Development, which was held on December 15-16, 2020. Its target audience is scientists studying processes of business structures, cooperation, business entities carrying out cooperation, as well as public authorities which will find guidelines for improving state regulation of the cooperative sector of the economy in this book.
