NOTES ON PLAYING ELLINGTON

At least 95% of modern-day large ensemble jazz playing comes out of three traditions: Count Basie's band, Duke Ellington's band, and the orchestrations of small groups. Those young players interested in jazz will be drawn to small groups for the opportunity and for practical reasons (it is much easier for one or two people than it is 11). Schools have taken over the task (formerly performed by dance bands) of training musicians to be ensemble players. Due to the Basie Band's popularity and its simplicity of style and emphasis on brass and swing, the better educators have almost exclusively adopted this tradition for teaching jazz ensemble playing. As wonderful as Count Basie's style is, it doesn't address many of the important styles developed under the great musical umbrella we call jazz. Duke Ellington's comprehensive and eclectic approach to music offers an alternative.

The stylistic richness of Ellington's music presents a great challenge to educators and performers alike. In Basie's music, the conventions are very clearly consistent. In Ellington's, there are many more exceptions to the rules. This calls for greater knowledge of the language of jazz. Clark Terry, who left Count Basie's band to join Duke Ellington, said, "Count Basie was college, but Duke Ellington was graduate school." Knowledge of Ellington's music prepares you to play any big band music.

The following is a list of performance conventions for the great majority of Ellington's music. Any deviations or additions will be spelled out in the individual performance notes that follow.

1. Listen carefully many times to the Ellington recording of these pieces. There are many subtleties that will elude even the most sophisticated listener at first. Although it was never Ellington's wish to have his recordings imitated, knowledge of these definitive versions will lead musicians to make more educated choices when creating new performances. Ellington's music, though written for specific individuals, is designed to inspire all musicians to express their selves. In addition, you will hear slight note differences in the recording and the conventions. This is intentional because there are mistakes and alterations from the original versions of the music in the recording. You should never your players play exactly in the recording.
2. General use of being phrasing. The triplet feel prevails except for bass and saxophone parts such as when eighth or Latin appear. In these cases, eighth notes and quarter notes are equivalent.
3. There is a chain of command in ensemble playing. The lead player in each section determines the phrasing and volume for their own section, and their section must conform to the lead. When the saxes and/or trombones play with the trumpet, the trumpet is the lead. The lead alto and trombone must listen to the first trumpet and follow him. In sum, the saxes and trombones must follow their lead players. When the saxes and the brass play, the brass should not overtake him. That means that the saxes and the trumpet is actually playing "second." If this is done effectively, there will be very little back and forth left for the conductor.
4. In Ellington's music, each player should express a personality of his or her own. He must find a musical balance of supporting and following the section leader, following out the character of the underpart. Each player should be encouraged to contribute his or her personality through the music. In this way, the two parts are played at the same volume and with

7. Crescendos as you ascend and diminuendo as you descend. The upper notes of phrases receive a natural accent, and the lower notes are grouped. Alto and tenor saxophonists need to use sustains in the lower part of their range in order to blend properly with the rest of the section. This music was originally written for the trumpet, so the natural tendencies of the instruments are louder in the upper part of the instrument and softer in the soft part of the instrument. For instance, a B-flat note of a trumpet will be loud, and a low C will be soft.
8. Quarter notes are generally played with a stress of the first half. Long marks above or below a note indicate full value, but just above or below a note, the note is played full value except when followed by a tied or definite note. A note longer than a quarter note are played full value unless it is followed by a tied note. In such cases, the note after the tied appears. For example, a half note occurring at the end of a measure would be released on beat 1.
9. Unusually long notes and long backgrounds. Long notes should be played somewhat *pp*, and the player must control the volume. It is important that the moving parts can be heard in the music. Notes, dynamics, and phrasing should be used to give them life and personality. Use of accents, crescendo, or diminuendo. There is a great deal of attention in Ellington's music to such things as phrasing, dynamics, and rhythmic figures. In general, all rhythmic figures need to be phrased. Accents give the music life and swing. This is very important.
10. Ellington's music is about individuality: one person per part—do not double-up because you are extra players. Use more strength. More than one on a part makes it sound more like a concert band and less like a jazz band.
11. This is the bass. Keep embouchure to an absolute minimum; in the best hands, almost no embouchure should be necessary. Everyone needs to develop a big sound. It is the conductor's job to balance the band. When a guitar is used, it should be a hollow-body, unamplified guitar. Simple three-note voicings should be used throughout. An acoustic string bass is a must. In mediocre or poorly designed halls, the bass and piano may need a bit of a boost. I recommend mixing them and putting them through the house sound system. This should provide a much better tone than an amplifier. Keep in mind that the rhythm section's primary function is to accompany. The bass should not be as loud as a trumpet. That is unnatural and leads to over-amplification, bad tone, and lesser dynamics. Stay away from monitors. They provide a false sense of balance.
12. Solo and rhythm section parts without chord changes should be played as is or with a little embellishment. Solo and rhythm section parts with chord changes should be improvised. However, written passages should be learned because they are an important part of our jazz heritage and help the player understand the function of his particular kind of accompaniment. Solos should learn the chord changes. Solos should not be approached as opportunities to show off technique, range, or volume, but should be looked at as a great opportunity to further develop the interesting thematic material that Ellington has provided.
