The Big House:

The Big House Carolyn Coman, 2016-11-04 When their parents are sent up the river for embezzlement Ray and Ivy are left to live in the lap of luxury with Marietta Noland and her ancient husband Lionel But life at the big house is not all it s cracked up to be First there is the shrouded portrait then there is the spider in the decaying wedding cake And what about the vicious instrument Marietta uses to decapitate her egg When the rain in Spain begins to fall in other words Ray wets his bed things go from bad to worse and Ivy knows it is time to take matters into her own hands What follows is a hilarious lark as Ray and Ivy case the joint get the skinny and show Marietta she has met her match *The Big House* George Howe Colt, 2012-08-07 Faced with the sale of the century old family summer house on Cape Cod where he had spent forty two summers George Howe Colt recounts returning for one last stay with his wife and children in this stunning memoir that was a National Book Award Finalist and a New York Times Notable Book of the Year This poignant tribute to the eleven bedroom jumble of gables bays and dormers that watched over weddings divorces deaths anniversaries birthdays breakdowns and love affairs for five generations interweaves Colt s final visit with memories of a lifetime of summers Run down yet romantic The Big House stands not only as a cherished reminder of summer s ephemeral pleasures but also as a powerful symbol of a vanishing way of life The Big House William Murray, 2004-05-06 In book 8b Peter and Jane s family look after a friend s house in 91 new words including sunny private room and dressing Once this book has been completed the child moves on to book 9b **Technology and the Big House in Ireland, C. 1800-c. 1930** Charles John Thomas Carson, 2009 By the beginning of the nineteenth century over ninety five percent of all the productive land in Ireland was in the hands of Anglo Irish landowners They lived in the big houses some of which still exist today resplendent within their walled estates Many others are now only gaunt ruins silhouetted against somber Irish skies victims of the troubles in the 1920s There is a continuing fascination with the history of the big house in Ireland Much of this interest stems from the Anglo Irish living in places apart in their estates often in remote areas of an undeveloped and hostile land Part of the appeal is in the characters neither wholly English nor Irish who made up this landowning class in Ireland However another part largely ignored until this study is how many of these landowners not only met these challenges but achieved remarkable levels of self sufficiency It was their exploitation of technology that hugely bolstered their status and independence and enabled them to lead an exotic lifestyle in Ireland Although much has been written regarding the social and political history of the Anglo Irish in Ireland little research has been conducted into the practical problems of living there At a time when there were few roads no railways and sailing ships were the unreliable connection with England existence might have been very basic indeed Charles Carson uncovers and explains in simple terms the technologies employed to not only make life bearable but in some case to become a triumph over seemingly impossible odds An appreciation of this background helps to explain the sense of status and independence that emanates from the big house in Ireland until their demise in the late twentieth century

Interdisciplinary investigative methods were used in this work. These included extensive archival research of estate papers throughout Ireland, fieldwork involving examination and photography of still extant big house technology, and the use of published fictional and biographical big house material. Much additional insight and suggestions for further research resulted from visits to various big house locations. Owners, often descendants of the original families or managers, and ground staff provided important local knowledge. Climbing amongst stored artefacts in cellars, barns, and subterranean tunnels helped to bring the past alive. Something of the ambiance of these explorations informs this book, thus helping towards an understanding of the fundamental importance of technology in underpinning the status and independence of the big house in Ireland. By examining the range, costs, and changing nature of the technologies employed, this book makes an important contribution to a deeper understanding of life in the big house in Ireland circa 1800 to circa 1930. Brief descriptions, accompanied by drawings or photographs, are employed to explain the operation, limitations, and improvements of many of the installations and techniques. These include water closets, pumps, cisterns, boilers, and firefighting equipment; open fires, hot air stoves, and central heating; walled gardens, hot walls, and beds; warm air, steam, and hot water heating of glasshouses; the construction, location, stocking, and use of ice houses and ice; daylight enhancement; candle, oil, gas, and electric lighting; an optical telegraph; a church spire; engine-driven equipment on the estate farm; as well as mapping of bogs and their reclamation by wooden railways. *Technology and the Big House in Ireland c 1800 c 1930* is an important reference source for Irish study groups worldwide.
