The Catskills:

The Catskills Alf Evers, 1982 The Catskills tells the story of one of America's most historically rich and romantic regions. Alf Evers evokes the special charm of the Catskills region with explorations of its flora and fauna, legends, superstitions, and natural and unnatural wonders. Packed with illustrations detailing the history of the Catskills from the time of its first settling through the Revolutionary and Civil Wars, the Borscht Belt years, the famed Woodstock festival up to the present, *The Catskills* is a memorable book that does full justice to a vital vein of our American heritage. *The Catskills* Arthur G. Adams, 1990 This scrupulously revised edition offers a comprehensive introduction to the beauty and wonder of the Catskill mountain region. Combining a wealth of information with abundant illustrations, the book falls into four main sections. The first section deals principally with the geography of the area. Part Two focuses on the region's history with subsections on Railroad Fever, The Romantic Era, War and Revolution, and Famous Hotels. Part Three devoted to the Catskill's legends, literature, and art features descriptive passages from the work of such famous writers as James Fenimore Cooper and Washington Irving. The final section is an extensive gazetteer that provides succinct descriptions of the mountains, ranges, rivers, brooks, kills, creeks, and other geographical features of the region.

Making Mountains David Stradling, 2009-11-23 For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City. In *Making Mountains*, David Stradling shows the transformation of the Catskills landscape as a collaborative process, one in which local and urban hands, capital, and ideas have come together to reshape the mountains and the communities therein. This collaboration has had environmental, economic, and cultural consequences. Early on, the Catskills were an important source of natural resources. Later, when New York City needed to expand its water supply, engineers helped direct the city toward the Catskills, claiming that the mountains offered the purest and most cost-effective waters. By the 1960s, New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water. The Catskills also served as a critical space in which the nation's ideas about nature evolved. Stradling describes the great influence writers and artists had upon urban residents, especially the painters of the Hudson River School, whose ideal landscapes created expectations about how rural America should appear. By the mid-1800s, urban residents had turned the Catskills into an important vacation ground, and by the late 1800s, the Catskills had become one of the premiere resort regions in the nation. In the mid-twentieth century, the older Catskill resort region was in steep decline, but the Jewish Borscht Belt in the southern Catskills was thriving. The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape. Throughout each of these significant incarnations, urban and rural residents worked in a rough collaboration, though not without conflict, to reshape the mountains and American ideas about rural landscapes and nature. *The Catskills* Thomas Morris Longstreth, 1918 *The Catskills* Stephen M. Silverman, Raphael D. Silver, 2015-10-27 The Catskills Cat Creek in Dutch America's original frontier northwest of New York City with its seven hundred thousand acres of forest.
