The Blind Spot:

The Blind Spot Jacqueline Lichtenstein, 2008 Beginning in the seventeenth century the greatest French writers and artists became embroiled in a debate that turned on the priority of painting or sculpture touch or sight color or design ancients or moderns Jacqueline Lichtenstein guides readers through these historic quarrels decoding the key terms of the heated discussions and revealing how the players were influenced by the concurrent explosion of scientific discoveries concerning the senses of sight and touch Drawing on the work of Rene Descartes Roger de Piles Denis Diderot Charles Baudelaire and Emile Zola among others *The Blind Spot* lets readers eavesdrop on an energetic and contentious conversation that preoccupied French intellectuals for three hundred years

The Blind Spot Effect Kelly Boys, 2018-07-01 Do you ever feel like you re experiencing your life at only a fraction of its true clarity and depth Are your days dominated by a single emotion such as fear sadness anger or disappointment At work or in your personal life do you find yourself facing similar relationship patterns or conflicts again and again From our earliest years we all acquire blind spots in the way we perceive feel and think Driven by our biology life experiences cultural messages and physical environment they profoundly affect us throughout our lives This informative and practical guide invites us to understand how we get them how to bring them to light and how to work with that newfound awareness to improve our lives Here author Kelly Boys presents emerging research from many fields of psychology and neuroscience personal stories and a wealth of hands on exercises and practices to help us identify welcome and transform our own hidden domains Join her to explore What we miss and how we miss it Attentional blink gaps in our sensory awareness and our astonishing potential to perceive more in each moment Decoding your unconscious stories how they filter the truth and influence you Hacking your intuition why our gut instincts are not always accurate and ways to get it right more often The defended self uncovering the core beliefs that shape your emotional landscape Using moments of crisis to reveal especially elusive blind spots Falling in love crushing cheating and wholehearted loving shining a light into the wilderness of intimate relationships Three biases that sabotage our judgment and how to counter them Self compassion welcoming and vulnerability keys to clearer self perception Flow states becoming fully immersed in what you do without the filters that diminish your natural way of perceiving and being Seeing yourself as others see you safely engaging with someone you trust to gain greater self awareness Illuminating the biggest blind spot of all the illusion of an isolated and separate self and how to free ourselves from the traps it creates Chapter by chapter practices somatic contemplative and mindfulness based for self discovery and change Once we recognize our blind spots we can t unsee them We release ourselves from unnecessary suffering and begin to experience each moment more richly With *The Blind Spot Effect* you re invited to illuminate what is right in front of you and within you for greater wonder joy and fulfillment

The Blind Spot Adam Frank, Marcelo Gleiser, Evan Thompson, 2024-03-05 A compelling argument for including the human perspective within science and for how human experience makes science possible This is by far the best book I ve

read this year Michael Pollan Professor of the Practice of Non fiction Harvard University 1 New York Times bestselling author A stimulating manifesto for changing the way we look at things Wall Street Journal It s tempting to think that science gives us a God s eye view of reality But we neglect the place of human experience at our peril In *The Blind Spot* astrophysicist Adam Frank theoretical physicist Marcelo Gleiser and philosopher Evan Thompson call for a revolutionary scientific worldview where science includes rather than ignores or tries not to see humanity s lived experience as an inescapable part of our search for objective truth The authors present science not as discovering an absolute reality but rather as a highly refined constantly evolving form of human experience They urge practitioners to reframe how science works for the sake of our future in the face of the planetary climate crisis and increasing science denialism Since the dawn of the Enlightenment humanity has looked to science to tell us who we are where we come from and where we re going but we ve gotten stuck thinking we can know the universe from outside our position in it When we try to understand reality only through external physical things imagined from this outside position we lose sight of the necessity of experience This is the Blind Spot which the authors show lies behind our scientific conundrums about time and the origin of the universe quantum physics life AI and the mind consciousness and Earth as a planetary system The authors propose an alternative vision scientific knowledge is a self correcting narrative made from the world and our experience of it evolving together To finally see the Blind Spot is to awaken from a delusion of absolute knowledge and to see how reality and experience intertwine *The Blind Spot* goes where no science book goes urging us to create a new scientific culture that views ourselves both as an expression of nature and as a source of nature s self understanding so that humanity can flourish in the new millennium
