## **The Charter School Dust:**

**The Charter School Dust-up** Martin Carnoy, Rebecca Jacobsen, Lawrence R. Mishel, Richard Rothstein, 2005 When federal statistics showed test scores lower in charter than in regular schools some charter school supporters insisted this must result from charter schools enrolling harder to teach minority students Data show however that typical charter school students are not more disadvantaged yet their average achievement is not higher Even if some charter schools are superior deregulation also permits charter schools that are inferior with average performance no higher than in regular public schools Debates spurred by federal charter school test data show how all debates about education could be improved by carefully accounting for the difficulty of educating particular groups of students before interpreting test scores and by focusing on student gains not their level of achievement at any particular time *Where Charter School Policy Fails* Amy Stuart Wells, 2002-09 Based on their own in depth study of 17 diverse charter schools in California and other recent studies from around the country the authors explore how the laissez faire policy of charter schools interacts with the lives of children educators and parents in diverse social economic and political contexts **WWC Quick Review of the Report "Charter School Performance in Los Angeles Unified School District** What Works Clearinghouse (ED), 2008 The study examined whether charter schools have higher growth in student achievement than traditional public schools The study analyzed data on 79 charter schools and 593 traditional public elementary middle and high schools in the Los Angeles Unified School District from 2005 06 to 2006 07 School level academic achievement was measured using the California Academic Performance Index API a composite measure of how well a school s students perform on standardized tests The research described in this report is not consistent with What Works Clearinghouse WWC evidence standards The study compared the annual API change in charter schools to the change in traditional schools Although the study attempts to match charter schools to traditional public schools based on racial and income composition parent education and geographic proximity it does not provide evidence that these two groups were initially equivalent on academic achievement Although the authors use statistical techniques to adjust for some differences it is possible that there were differences between the two groups that were not accounted for in the analysis and these differences could have influenced changes in API In addition schools with very low API levels may make greater gains than other schools simply because they have more room for improvement For these reasons differences in API trends between the two groups of schools cannot be attributed with confidence to the effect of charter schools The following report was the focus of this Quick Review Charter School Performance in Los Angeles Unified School District A District and Neighborhood Matched Comparison Analysis Aisha Toney and Danessa Murdock California Charter School Association June 2008 *Comprehensive Community Solutions, Inc. V. Rockford School District No. 205*, 2004 **Money and Schools** R. Craig Wood, David C. Thompson, Faith E. Crampton, 2019-05-08 Money and Schools explains and demonstrates the relationship between money and equality of educational opportunity in a way that is

Betts, Paul T. Hill, 2010-05-16 Charter schools offer something that public school systems parents and teachers need a way to experiment with alternative ways of teaching motivating students organizing schools using technology and employing teachers While people came down on both sides of support for or against charter schools everyone was surprised by how difficult it was to assess charter school performance The first part of this book focuses on how to improve estimates of charter schools performance especially their benefits to students who attend them the second part suggests how policymakers can learn more about charter schools and make better use of evidence The editors and authors suggest ways states and localities can improve the quality of data on which charter school studies are based and trace some of the ways charter school research influences policy North Carolina Reports North Carolina. Supreme Court, 1926 Cases argued and determined in the Supreme Court of North Carolina *Board of Education of Rockford School District No. 205 V. Hearing Board of the Counties of Boone and Winnebago*, 1987 Biennial Report Illinois. Office of the Superintendent of Public Instruction, 1904 **A National Study of Charter Schools** Paul Berman, RPP International, 1998 The second year report of the National Study of Charter Schools updates information on charter schools presented in the first report of the study The study is a 4 year research effort September 1995 to September 1999 intended to document and analyze the charter school movement It was designed to provide information about what kind of charter schools become operational about factors that influence charter schools development and about how schools are implementing their charters The second year report presents information about charter schools for the school year 1997 97 and is based on a telephone survey designed to collect data from the 428 charter schools in operation at that time The report is also based on site visits to 91 charter schools It places charter schools in perspective by looking at their operations accountability and impact on public education It demonstrates state approaches to the charter concept including legislative mandates and focuses on characteristics of charter schools students of charter schools why charter schools are started and
