## **The Conscious Organism:**

**Phenomenology and the Physical Reality of Consciousness** Arthur Melnick, 2011 The predominant positive view among philosophers and scientists alike is that consciousness is something realized in brain activity This view however largely fails to capture what consciousness is like according to how it shows itself to conscious beings What this work proposes instead is that consciousness is a phenomenon that exists in and throughout the body Apart from whether or not it involves intentionality and apart from whether or not it involves awareness of the self consciousness is self intimating self revealing self disclosing Self disclosure is the definitive phenomenological character of consciousness in all its forms Taking this stance as a point of departure the book presents a specific account of what bodily field phenomenon consciousness is In this way the current stalemate in philosophy over the question of the physical reality of consciousness is broken Series A

**The fabric(ation) of consciousness** Pieter F. Craffert ,2024-05-28 Consciousness is central to the quest for being human and for what the world is made of While there is widespread agreement on the significance of consciousness for clarifying the human condition there is no agreement on the phenomenon in search of theorising Although there is no shortage of theories and concepts of consciousness in current consciousness research the dominant critical analysis of consciousness research in this study although based on existing analyses is as far as I can see new and unique in arguing for a crisis in consciousness research This book touches on most aspects of consciousness research the hard problem of consciousness neural correlates of consciousness brain models and consciousness consciousness and dualistic thinking etc but is a critical analysis of consciousness research It is not an insider but a third person perspective on current consciousness research In this regard it differs from most introductions and overviews where these topics are presented from a first person perspective the insiders claim about their research Representing the broad spectrum of consciousness research in terms of the theoretical framework of a neuro ecological perspective is a new and innovative move Wisdom, Consciousness, and the Future Thomas Lombardo, 2011-06-17 Wisdom Consciousness and the Future Collected Essays Thomas Lombardo Ph D Center for Future Consciousness Wisdom Consciousness and the Future is a profound deeply important and timely book that concerned people and change agents everywhere will want to read Copthorne Macdonald The Wisdom Page As a college professor and teacher of psychology philosophy and the future Tom Lombardos mind has been drawn toward such questions as How will the human mind evolve in the future In fact how should the human mind evolve and improve itself What might be the standards and ideals that guide this evolution And what role does ethical development or evolution play in this process The twenty previously published articles collected together in Wisdom Consciousness and the Future chronicle the development of Dr Lombardos ideas on these related questions and topics and together constitute a theoretical perspective on the nature of the human mind on how to best educate and evolve the human mind in the future and how to integrate into this vision the central importance of both future consciousness as a key dimension of human consciousness and ethical

character virtues True to its title three key themes emerge in this collection wisdom consciousness and the future and all three concepts tie into the authors main contribution to the field of futures studies future consciousness Numerous essays for example *Evolving Future Consciousness through the Pursuit of Virtue* and *The Evolution and Psychology of Future Consciousness* address the nature of future consciousness a term Dr Lombardo defines as the complex set of mental capacities all humans possess for imagining conceptualizing and approaching the future Aside from describing the psychological make up of future consciousness which includes emotional motivational cognitive and personal dimensions the author also explains in numerous essays such as *Developing Constructive and Creative Attitudes about the Future* how to proactively enhance ones future consciousness Other essays deal directly with consciousness and the human mind in the broadest sense as in *The Future Evolution of the Ecology of Mind* and connect this general area of inquiry with the futurist question of how consciousness and mind might evolve in the future Dr Lombardo proposes that the progressive emergence of cosmic consciousness is the central evolutionary trajectory of the human mind Hence this book contains essays on both consciousness of the future and consciousness in the future While the discussion of consciousness and the future fascinates in its own right Dr Lombardo is a holistic and deep thinker who searches for connections among myriad philosophical topics A number of essays address the question of ethics and virtue and how such concepts connect with both future consciousness and the evolution of consciousness in the future He then expands on this theme to explore how virtue applies to the goals of higher education in essays such as *Ethical Character Development and Personal and Academic Excellence* In thinking through the concept of virtue and how it applies to consciousness education and the future Dr Lombardo emphasizes the one key virtue wisdom that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In *The Wisdom of Future Consciousness* the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argument *The Psychological Review*, 1897

**The Caldron of Consciousness** Ralph D. Ellis, Natika Newton, 2000-01-01 These new studies by prominent neuroscientists psychologists and philosophers work toward a coherent framework for understanding emotion and its contribution to the functioning of consciousness in general as an aspect of self organizing embodied subjects Distinguishing consciousness from unconscious information processing hinges on the role of motivating emotions in all conscious modalities and how emotional brain processes interact with those traditionally associated with cognitive function Computationally registering processing sensory signals e.g. in the occipital lobe or area V4 by itself does not result in perceptual consciousness which requires subcortical structures such as amygdala hypothalamus and brain stem This interdisciplinary anthology attempts to understand the complexity of emotional intentionality why the role of motivation in self organizing processes is crucial in

distinguishing conscious from unconscious processes how emotions account for agency and how an adequate approach to emotion motivation can address the traditional mind body problem through a holistic understanding of the conscious behaving organism Series B **The Evolution of the Conscious Faculties** J.
