The Constitution Of Selves:

The Constitution of Selves Marya Schechtman, 2018-10-18 An amnesia victim asking Who am I means something different from a confused adolescent asking the same question Marya Schechtman takes issue with analytic philosophy's emphasis on the first sort of question to the exclusion of the second The problem of personal identity she suggests is usually understood to be a question about historical life What she calls the reidentification question is taken to be the real metaphysical question of personal identity whereas questions about beliefs or values and the actions they prompt the characterization question are often presented as merely metaphorical Failure to recognize the philosophical importance of both these questions Schechtman argues has undermined analytic philosophy's attempts at offering a satisfying account of personal identity Considerations related to the characterization question creep unrecognized into discussions of reidentification with the result that neither question is adequately addressed Schechtman shows how separating the two questions allows for a more fruitful approach to the reidentification question and she develops her own narrative account of characterization She suggests that persons constitute their identities by developing autobiographical narratives that bear the right relation to facts about the environment the general concept of a person and other people's concepts of who they are

these facilities In these nursing homes there is no division or hate based on religion colour or race but only bridges which promote solidarity love harmony and universal brotherhood If these people can live under one roof eat the same food and pray together then what excuses do we have No religion teaches division hate or retaliation but promotes only Love and compassion My wish is to see the promotion of religion of Humanity by everyone and the practice of God s Love everywhere
