*Émigré Voices* Bea Lewkowicz,Anthony Grenville,2021-11-22 In migr Voices Lewkowicz and Grenville present twelve oral history interviews with men and women who came to Britain as Jewish refugees from Germany and Austria in the late 1930s Many of the interviewees rose to great prominence in their chosen career such as the author and illustrator Judith Kerr the actor Andrew Sachs the photographer and cameraman Wolf Suschitzky the violinist Norbert Brainin and the publisher Elly Miller The narratives of the interviewees tell of their common struggles as child or young adult refugees who had to forge new lives in a foreign country and they illuminate how each interviewee dealt with the challenges of forced emigration and the Holocaust The voices of the twelve interviewees provide the reader with a unique and original source which gives direct access to the lived multifaceted experience of the interviewees and their contributions to British culture *Experiencing Time* Simon Prosser,2016 Our engagement with time is a ubiquitous feature of our lives We are aware of time on many scales from the briefest flicker of change to the way our lives unfold over many years But to what extent does this encounter reveal the true nature of temporal reality To the extent that temporal reality is as it seems how do we come to be aware of it And to the extent that temporal reality is not as it seems why does it seem that way These are the central questions addressed by

Simon Prosser in *Experiencing Time* These questions take on a particular importance in philosophy for two reasons Firstly there is a view concerning the metaphysics of time known as the B theory of time according to which the apparently dynamic quality of change the special status of the present and even the passage of time are all illusions Instead the world is a four dimensional space time block lacking any of the apparent dynamic features of time If the B theory is correct as the book argues then it must be explained why our experiences seem to tell us otherwise Secondly experiences of temporal features such as changes rates and durations are of independent interest because of certain puzzles that they raise the solutions to which may shed light on broader issues in the philosophy of mind
