Thinking Stories 2:

Twenty Thinking Tools Philip Cam, 2006-06-01 *Twenty Thinking Tools* introduces teachers to the theory and practice of collaborative inquiry and provides an easy to follow guide to the tools that students will acquire as they learn to examine issues and explore ideas. The book is designed to support the development of collaborative inquiry based teaching and learning through class discussion and small group work. Beginning with an Introductory Toolkit *Twenty Thinking Tools* shows teachers how to strengthen students abilities to ask insightful questions to look at problems and issues from various points of view to explore disagreements reasonably to make appropriate use of examples to draw needful distinctions and generally to develop their imaginative conceptual and logical abilities in order to gain a deeper knowledge and understanding of all kinds of subject matter. The Intermediate and Advanced Toolkits show teachers how to encourage students to make appropriate use of such things as counterexamples, criteria, generalisation, informal reasoning and elementary deductive logic. The Toolkits also include devices for distinguishing between different kinds of questions for tracking disagreement and for recording discussion. *Twenty Thinking Tools* takes students from the early years of schooling right through to the senior secondary school and is illustrated throughout with examples from the classroom supporting exercises and activities. This book is indispensable for teachers wanting to assist students in investigating the nature of ethical concepts and in understanding how reasoning can assist with ethical judgement in line with Australian Curriculum requirements. *Philosophical Inquiry with Children* Gilbert Burgh, Simone Thornton, 2018-12-07 *Philosophy in schools in Australia* dates back to the 1980s and is rooted in the Philosophy for Children curriculum and pedagogy. Seeing potential for educational change, Australian advocates were quick to develop new classroom resources and innovative programs that have proved influential in educational practice throughout Australia and internationally. Behind their contributions lie key philosophical and educational discussions and controversies which have shaped attempts to introduce philosophy in schools and embed it in state and national curricula. Drawing together a wide range of eminent scholars and practitioners in the field of educational philosophy, this anthology, the first of its kind, provides not only a historical narrative but an opportunity to reflect on the insights and experiences of the authors that have made history. The collection is divided into three parts. The overarching theme of Part I is the early years of Philosophy for Children in Australia and how they informed the course that the philosophy in schools movement would take. Part II focuses on the events and debates surrounding the development and production of new materials, including arguments for and against the suitability of the original Philosophy for Children curriculum. In Part III, key developments relating to teaching philosophy in schools are analysed. This collection of diverse views, critical appraisals and different perspectives of historical currents is intended to stimulate thought provoking questions about theory and practice and to increase general awareness, both nationally and internationally, of the maturation of philosophy in schools in Australia. It is also intended to encourage readers to identify emerging ideas and develop strategies for their implementation. *Children Philosophize*

Worldwide Eva Marsal, Takara Dobashi, Barbara Weber, 2009 Philosophizing for with and by children in a community of inquiry has proven to be an internationally successful learning strategy that enhances both the cognitive and emotional growth of children Pioneering democratic programs for philosophizing with children now exist throughout the world The work described in this book represents the latest research on theoretical concepts and applied projects within this field and brings together contributions from twenty nine countries representing all continents The authors address questions on the theoretical foundation of Philosophy for Children the application of philosophical methods the community of inquiry international and national didactical concepts as well as the evaluation of those concepts A primary goal of this book is to enhance intercultural academic exchange and to encourage further research and practical work in this field **Once Upon an If** Peter Worley, 2014-01-31 If you want to tell more stories in the classroom but lack the confidence to do so If you need guidance finding stories that are good to get children thinking If you like using stories in your teaching but want to get more from them than the moral at the end *Once Upon an If* is the book for you In his brand new book award winning author Peter Worley provides a comprehensive guide to everything a would be storyteller needs including how to bring a story to life tips on how to memorise a story and improvise descriptions and techniques for using tone movement and timing to engage and involve the children in your class *Once Upon an If* also comprises a treasury of stories new and old written especially to get a young audience thinking actively about the deeper issues that lie behind and within the tales Guidance notes lesson plans and activity questions are included with every story and there is a companion website including extra resources for you to use on your interactive whiteboard *Once Upon an If* draws on Peter s ten years of experience as a philosophy teacher trainer and storyteller to help any teacher place stories and storytelling where they should be back at the heart of teaching **The Conscious Teacher** Deborah Nichols Poulos, 2020-01-13 *The Conscious Teacher* is about all kinds of strategies and techniques educators might employ to become more effective teachers In an accessible conversational style Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike She begins with her personal story of not being able to read all through elementary school Her early failures convinced her she was dumb At first she struggled but when she still failed she adopted an avoidance strategy that served her well until junior high An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and later to applying the lessons she learned as a child to her own teaching What makes *The Conscious Teacher* unique are the inspirational lessons that are unlike what most teachers get in their teacher education courses or student teaching Ms Nichols Poulos points out for example that from the very first day it is important that students learn they will be treated with dignity and respect no matter what And especially helpful are the steps Ms Nichols Poulos employs to set up a behavior management plan that works She explains the strategic steps she takes before school starts how essential it is to get to know each student before they walk into class on that first day She also illustrates how setting up classroom routines helps students know what to

expect and how to make the best use of every minute And she emphasizes the importance of the parent student teacher team and includes many examples of how to communicate with and involve parents even those who may be difficult Foundational to her program are reading and writing Among other things she lays out the steps for students even as early as fourth grade to write five paragraph essays and their own student authored books and to research and write reports that include bibliographies When she differentiated curriculum to support all students needs she found their learning accelerated All teachers will appreciate her ideas about how to teach the basics of math as well as advanced math concepts And her ideas for teaching the arts are inspirational as she describes in detail how her fourth graders performed Shakespeare s Hamlet Macbeth King Lear Julius Caesar and A Midsummer Night s Dream She also shows how to integrate social studies with literature and writing Her experiences taught her that young students are much more capable than many people realize The Conscious Teacher is an indispensable guide for all new teachers Many of the ideas Ms Nichols Poulos provides will also be an eye opener for parents and experienced teachers as well The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling

Reasonable Children Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with

children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
