Topic Focus Articulation Tripartite Structures And Semantic Content:

Topic-Focus Articulation, Tripartite Structures, and Semantic Content Eva Hajicová, Barbara B.H. Partee, P. Sgall, 2013-03-09 1 1 OBJECTIVES The main objective of this joint work is to bring together some ideas that have played central roles in two disparate theoretical traditions in order to contribute to a better understanding of the relationship between focus and the syntactic and semantic structure of sentences Within the Prague School tradition and the branch of its contemporary development represented by Hajicova and Sgall HS in the sequel topic focus articulation has long been a central object of study and it has long been a tenet of Prague school linguistics that topic focus structure has systematic relevance to meaning Within the formal semantics tradition represented by Partee BHP in the sequel focus has much more recently become an area of concerted investigation but a number of the semantic phenomena to which focus is relevant have been extensively investigated and given explicit compositional semantic analyses The emergence of tripartite structures see Chapter 2 in formal semantics and the partial similarities that can be readily observed between some aspects of tripartite structures and some aspects of Praguian topic focus articulation have led us to expect that a closer investigation of the similarities and differences in these different theoretical constructs would be a rewarding undertaking with mutual benefits for the further development of our respective theories and potential benefit for the study of semantic effects of focus in other theories as well Topic-Focus Articulation, Tripartite Structures, and Semantic Content Eva Hajicova, Barbara Partee, P. Sgall, 2014-01-15 **Semantics Versus Pragmatics** Zoltan Gendler Szabo, 2005-01-06 This is a collection of papers by leading scholars in the philosophy of language and theoretical linguistics on how semantics and pragmatics embed into a larger theory of interpretation and also on the disputed territories between these disciplines **Syntax-Semantics Interface** Eva Hajičová, 2018-03-01 The volume SYNTAX SEMANTICS INTERFACE is a collection of selected studies written by Eva Hajičová and published between the years 1973 and 2014 The contributions are based on the theoretical framework of the Functional Generative Description as proposed by Petr Sgall in early sixties and developed further by him and his followers since then Thematically the volume reflects the author's research contributions to four main domains i the specification of the underlying deep sentence structure analyzed in terms of dependency relations ii the information structure of the sentence topic focus articulation and its relation to the specification of presupposition and negation and to other related phenomena iii building of a scheme of annotated corpus of Czech to serve among other things for verification of linguistic theoretical claims and iv some fundamental aspects of discourse structure namely the notion of the hierarchy of elements in the stock of knowledge shared by the speaker and the hearer All the papers except for one have been originally published in English and in they pay due respect to a comparison of the author's original findings with the current state of the art of linguistic theory at home and abroad Information Structure Anita Steube, 2013-03-01 The first volume of the series is devoted to the subjects information structure and contrast The working hypothesis is that apart from the use of

lexical indication the expression of contrast vs correction is primarily carried by the intonation contour as a means for indicating scope and focus in negating constructions The papers in this volume proceed from the premise that the information structure is preformed conceptually and on articulation in the dynamic context is then portioned and linearized mapped onto the syntactic representation via the semantic representation and finally realized intonationally The findings are partly based on neurolinguistic and psycholinguistic experiments

Text, Speech and Dialogue Vaclav Matousek, Pavel Mautner, 2009-08-25 Annotation This volume constitutes selected papers from the 12th International Conference on Text Speech and Dialogue TSD 2009 held in Pilsen Czech Republic in September 2009 This volume contains a collection of submitted papers presented at the conference which were thoroughly reviewed by three members of the conference reviewing team consisting of more than 40 top specialists in the conference topic areas A total of 53 accepted papers out of 112 submitted altogether contributed 127 authors and co authors were selected for presentation at the conference by the program committee and then included in this book Theoretical and more general contributions were presented in common plenary sessions Problem oriented sessions as well as panel discussions then brought together the specialists in limited problem areas with the aim of exchanging knowledge and skills resulting from research projects of all kinds

Prague Linguistic Circle Papers Eva Haji?ová, Miroslav Cervenka, Oldrich Leska, Petr Sgall, 1995 This volume is the first one of the revived series of Travaux which was the well known international book series of the classical Prague Linguistic Circle published in the years 1929-39 The tradition of the Circle still attracts attention in broad circles of European and American linguistics The first volume of the new series is divided into five sections 1 Introductory papers characterizing the development of the Prague School in the recent decades 2 Methodological issues of structural and functional linguistics 3 Sentence structure 4 Discourse patterns 5 Theory of literature In accordance with the tradition the volume contains contributions concerning issues of principle empirical linguistic studies and also papers from the theory of literature

Topic and Focus Chungmin Lee, 2007-01-16 This book contains a collection of papers exploring the cross linguistic expression of topic and focus A diverse set of perspectives from some of the leading scholars in the areas of semantics and intonation are represented in the collection which is based on papers presented at the Topic and Focus Workshop at the 2001 LSA Summer Institute in Santa Barbara This book is unique in the breadth of its typological coverage of topic and focus phenomena Material is presented from nine languages including several that are severely under documented from a theoretical perspective The expression of topic and focus are integral aspects of linguistic communication that introduce the content of discourse and emphasize its most crucial elements Topic and focus phenomena are complex and involve both a meaning and a prosodic component This book is the first collection of papers devoted to the rigorous examination of both semantic and intonational features of topic and focus from a broad typological perspective

Semantics and Pragmatics Katarzyna Jaszczolt, 2002 This is a comprehensive and wide ranging introduction to various approaches to meaning The book

contains a critical discussion of these approaches and gives accessible explanations of relevant terminology *The Syntax and Pragmatics of Contrastive Topic in Czech* Anne Sturgeon, 2006 **The Prague Bulletin of Mathematical Linguistics**, 2007 *American Book Publishing Record*, 1999 **Proceedings from Semantics and Linguistic Theory**, 2003 The Logica Yearbook, 2007 **Annual Workshop on Formal Approaches to Slavic Linguistics** Wayles Browne, 2003 Grammar and Information Structure Natalia Slioussar, 2007 **The Discourse Potential of Underspecified Structures** Anita Steube, 2008 The volume demonstrates the interdependence of man's language capacity and his other conceptual capacities This enables linguistic structures to be minimalised and for extra linguistic domains to provide much of the interpretations of sound and meaning Underspecification is demonstrated in the word formation of Indo European Late Archaic Chinese and modern Khmer on the word and sentence levels by the event structures of German and in the information structure predominantly of languages with the so called free word order German Slavic languages Arabic compared with English and the tone language Hausa The volume is noteworthy due to the close cooperation between theoretical and experimental research Within grammar it has especially strengthened prosodic research and the syntax phonology interrelations and their interpretations and it has helped to create data bases for the relations within texts and to evaluate the findings **Processing Information Structure** Heidi Wind Cowles, 2003 *Reference and Quantification* Greg N. Carlson, Francis Jeffrey Pelletier, 2005 This volume presents a series of state of the art papers on current issues in formal semantics and pragmatics by a series of highly distinguished leading scholars whose own thinking and research has been directly influenced by the work of Barbara H Partee Focusing on issues that surround the semantics of quantification and reference in natural language this collection of papers provides both an overview of topics in current research in formal approaches to meaning and a discussion of the origins of that research in Partee's own highly influential writings Topics include the fundamental issues of compositionality and information structure the analysis of tense and aspect the issue of de dicto and de re meanings and the nature of noun phrase meanings names indefinites and English any These contributions reflect both the wide range and the fertility of the basic problems addressed in Partee's work *The Linguistics Philosophy Interface* Rajesh Bhatt, 2000
