Topical Dictionary Of Statistics:

A Topical Dictionary of Statistics Gary L. Tietjen, 1987-01-15 *A Topical Dictionary of Statistics* Gary L. Tietjen, 2012-12-06 Statistics is the accepted body of methods for summarizing or describing data and drawing conclusions from the summary measures Everyone who has data to summarize thus needs some knowledge of statistics The first step in gaining that knowledge is to master the professional jargon This dictionary is geared to offer more than the usual string of isolated and independent definitions it provides also the context applications and related terminology The intended audience falls into five groups with rather different needs 1 professional statisticians who need to recall a definition 2 scientists in disciplines other than statistics who need to know the acceptable methods of summarizing data 3 students of statistics who need to broaden their knowledge of their subject matter and make constant reference to it 4 managers who will be reading statistical reports written by their employees and 5 journalists who need to interpret government or scientific reports and transmit the information to the public

A Casebook for Spatial Statistical Data Analysis Daniel A. Griffith, Larry J. Layne, 1999 This volume compiles geostatistical and spatial autoregressive data analyses involving georeferenced socioeconomic natural resources agricultural pollution and epidemiological variables Benchmark analyses are followed by analyses of readily available data sets emphasizing parallels between geostatistical and spatial autoregressive findings Both SAS and SPSS code are presented for implementation purposes This informative casebook will serve geographers regional scientists applied spatial statisticians and spatial scientists from across disciplines
