Topographien Der Mordene:

Stefan Wewerka : architect, designer, object artist ; Architekt, Designer, Objektkünstler Volker Fischer, Stefan Wewerka, Andrea Gleiniger, 1998 Text in English and German The oeuvre of Stefan Wewerka occupies a unique position in post war art because of the way in which he mixes different genres Wewerka is an uomo universale an uncomfortable pedagogue a bringer of enlightenment In addition to his practical work as an architect his competition entries have had a lasting effect on architectural discourse he has alienated architecture photographically or with the aid of traditional artistic techniques has written books has painted pictures has made films and object art In the early 50s Wewerka involved himself in earth architecture early attempts to build with nature and not against it and this at a time when no one was talking about ecology or even green building Wewerka became known to a wider public in the 60s by the artistic alienation of chairs and other everyday objects which he sawed up or distorted in order to undermine familiar images subversively He also did not leave architectural high culture untouched Triumphant arches like the Arc de Triomphe in Paris or Gothic cathedrals heel over or buckle to form surreal structures and thus make their ideological claims questionable In the late 70s Wewerka also started to design furniture which had high utility value despite its free form and which emanate an almost Bauhaus like dignity All this furniture like the Fan Desk the three legged chair or the One Swinger and also his Kitchen Tree and the programmatic Cella furniture system stand like sculptures in the space and always derive a new and surprising variant from subjects and genres that seemed to be closed The internationally known architecture and design historian Volker Fischer was vice director of the Deutsches Architekturmuseum in Frankfurt for over 10 years For some time now he has been building up a new design department in the Museum fur Kunsthandwerk in Frankfurt in addition to his museum work he teaches history of architecture and design at the Hochschule fur Gestaltung in Offenbach Like Volker Fischer architectural historian Andrea Gleiniger worked for many years in the Deutsches Architekturmuseum in Frankfurt she now teaches at the Staatliche Hochschule fur Gestaltung in Karlsruhe Her principal working fields are the history of housing estates in the 20th century and the relationship between architecture art and the new media

The Minimum Dwelling Revisited Aristotle Kallis, 2023-10-05 This book provides an intellectual history of the modernist minimum dwelling exploring how early modernism saw mass housing as a primary vehicle for achieving the utopian transformation of society It reappraises the often overlooked 2nd and 3rd CIAM conferences 1929 31 addressing their engagement with the minimum dwelling and revealing them both as milestones in the organisation s annals and as seminal moments in the history of interwar modernism In 1929 an eclectic international group of avant garde modernist architects including Ernst May Mart Stam Walter Gropius and Le Corbusier met in Frankfurt for the second instalment of the CIAM conferences They discussed a design programme for cost effective good quality housing seeking new approaches and processes to maximize quality and functionality while ensuring affordability for the wider population In exploring the meaning and form of the minimum dwelling they also re

defined dwelling as the hub of a new way of living proposing a revolutionary multi scalar approach to urban design based on the concept of the Existenzminimum optimally minimal housing Despite the two conferences falling short of the organizer s expectations and being overshadowed by later instalments the participating architects sanctioned a semantic shift from minimum as bare necessity to a very different aspirational kind of minimalism transforming the entire conversation on mass low cost dwelling in design social and ethical terms Split into two parts The Minimum Dwelling Revisited first takes a genealogical approach to explore the provenance of the concept of minimum dwelling prior to the 2nd and 3rd CIAM conferences it then traces the proceedings of the two conferences themselves Addressing the origins of the minimum dwelling concept but also its legacies and serving as a corrective to the overemphasis on 4th CIAM conference and the Athens Charter the book is essential reading for scholars researching urban design during the Interwar period
