Storm Warning Nancy Mathis, 2007-03-06 A nail biting captivating look at tornados from personal stories of those impacted by the natural disasters to the history of the struggle to understand this bewildering force of Mother Nature May 3 1999 is a day that Oklahomans will never forget By the time the sun set over a ravaged plain some 71 tornadoes had claimed around 11 000 homes and businesses and caused 1 billion in damage One of them was a mile wide monster of incredible power the fiercest F5 twister to hit a metropolitan area and whose 300 mph winds were the fastest ever recorded Veteran journalist Nancy Mathis draws on many interviews to weave the story of those few terrifying hours that irrevocably changed the lives of many

Oklahomans Storm Warning features Kara Wiese who fought to save her son from the fatal winds and Charlie Cusack who followed the tornado's progress on television until it came knocking on his front door. Amazingly only thirty-eight people perished at the hands of the Oklahoma F5. Many lives were saved by the efforts of professionals such as Ted Fujita, the creator of the Fujita Scale and dubbed Mr. Tornado for his relentless pursuit to unravel a twister's mysteries, the oft-criticized but dogged government meteorologists, and Gary England, a resourceful TV weatherman whose tireless efforts prepared hundreds of people in the tornado's path.

Scanning the Skies Marlene Bradford, 2001. Tornadoes, nature's most violent and unpredictable storms, descend from the clouds nearly one thousand times yearly and have claimed eighteen thousand American lives since 1880. However, the U.S. Weather Bureau, fearing public panic and believing tornadoes were too fleeting for meteorologists to predict, forbade the use of the word "tornado" in forecasts until 1938. *Scanning the Skies* traces the history of today's tornado warning system, a unique program that integrates federal, state, and local governments' privately controlled broadcast media and individuals. Bradford examines the ways in which the tornado warning system has grown from meager beginnings into a program that protects millions of Americans each year. Although no tornado forecasting program existed before WWII, the needs of the military prompted the development of a severe weather warning system in tornado-prone areas. Bradford traces the post-war creation of the Air Force centralized tornado forecasting program and its civilian counterpart at the Weather Bureau. Improvements in communication, especially the increasing popularity of television, allowed the Bureau to expand its warning system further. This book highlights the modern tornado watch system and explains how advancements during the latter half of the twentieth century, such as computerized data collection and processing systems, Doppler radar, state-of-the-art television weather centers, and an extensive public education program, have resulted in the drastic reduction of tornado fatalities.

Tornado Warning Tamara Hart Heiner, 2014-05-06. The true story about seven ordinary women and one extraordinary event. Summer is coming, and the residents in Joplin, Missouri, anticipate the rush of freedom and activities that will follow graduation, summer classes, vacations, overflowing gardens, family time, and plenty of photo opportunities. What they don't anticipate is the mile-wide tornado that will devastate the town on May 22, 2011, in the middle of dinner preparations, visits to friends and family, and graduation ceremonies. The tornado kills over a hundred in the deadliest tornado disaster in a century and leaves thousands more homeless. In the face of this tragedy, seven women must gather their courage and hold their families together. Each will make different choices to protect loved ones and strangers and recover from the winds of destruction.

Storm Warning Chris Oxlade, 2004-09. This book explains what happens when a tornado strikes and discusses what causes tornadoes and what you can do to stay safe if you are ever near one.
