

James P. Bennett on Subjunctive Reasoning, Policy Analysis And Political Argument

*Walter Isard
Blane Lewis*

Cornell University

This article was developed from materials in a paper by Dr. James P. Bennett titled "No Second Thoughts about 'No First Use'—How Can the Policy Analyst Undertake Subjunctive Reasoning in Political Argument?", dated March 1984. It contains a number of new, basic ideas regarding political arguments and policy analysis. The authors, judging that these ideas should be presented early, even in preliminary form, have taken upon themselves the task to develop them in a consistent, orderly fashion. We have done this despite the fact that Bennett still considers his ideas to be first, rough statements. In interpreting Bennett the authors have undoubtedly missed some of his important points, and in certain instances may have misrepresented his argument. They take full responsibility for these omissions and misrepresentations.

In what follows we shall quote extensively from the Bennett manuscript. When we do so, the reader should bear in mind that these quotations are only preliminary statements, some of which Bennett may have already modified.

Subjunctive Reasoning:

Subjunctive Reasoning J.L. Pollock, 2012-12-06 I am indebted to many people for the help they gave me in the writing of this book. I owe a large debt to David Lewis and Robert Stalnaker on both general and specific grounds. As becomes apparent from reading the notes, the book would not have been possible without their pioneering work on subjunctive conditionals. In addition, both were kind enough to provide specific comments on earlier versions of different parts of the book, and Stalnaker read and commented on the entire manuscript. Closer to home, I am indebted to my colleagues Rolf Eberle and Henry Kyburg. If my erstwhile colleague Keith Lehrer and numerous graduate students for their helpful comments on various parts of the manuscript. Some of the material contained herein appeared first in the form of journal articles, and I wish to thank the journals in question for allowing the material to be reprinted here. Chapter One contains material taken from *The Possible Worlds Analysis of Counterfactuals* published in *Philosophical Studies* 29 (1976) 469. Reidel. Chapter Two contains material much revised from *Four Kinds of Conditionals* *Am Philosophical Quarterly* 12 (1975) and Chapter Three contains much revised material from *Subjunctive Generalizations* *Synthese* 28 (1974) 199. Reidel. CHAPTER I INTRODUCTION 1 SUBJUNCTIVE REASONING There exists quite a variety of statements which are in some sense subjunctive. The Oxford Handbook of Philosophical Methodology Herman Cappelen, Tamar Szabó Gendler, John Hawthorne, 2016-06-23 This is the most comprehensive book ever published on philosophical methodology. A team of thirty-eight of the world's leading philosophers present original essays on various aspects of how philosophy should be and is done. The first part is devoted to broad traditions and approaches to philosophical methodology, including logical empiricism, phenomenology, and ordinary language philosophy. The entries in the second part address topics in philosophical methodology such as intuitions, conceptual analysis, and transcendental arguments. The third part of the book is devoted to essays about the interconnections between philosophy and neighbouring fields, including those of mathematics, psychology, literature, and film, and neuroscience. **Essays on A Priori Knowledge and Justification** Albert Casullo, 2012-02-20 This book is a collection of essays concerning the concept and existence of a priori knowledge and the relationship between a priori knowledge and the related concepts of necessary truth and analytic truth. **Subjunctive Reasoning**, 1976 *The Architecture of the Imagination* Shaun Nichols, 2006-09-07 This volume presents new essays on the propositional imagination by leading researchers. The propositional imagination, the mental capacity we exploit when we imagine that everyone is colour blind or that Hamlet is a procrastinator, plays an essential role in philosophical theorizing, engaging with fiction, and indeed in everyday life. Yet only recently has there been a systematic attempt to give a cognitive account of the propositional imagination. These thirteen essays, specially written for the volume, capitalize on this recent work, extending the theoretical picture of the imagination and exploring the philosophical implications of cognitive accounts of the imagination. The book also investigates broader philosophical issues surrounding the propositional imagination. The first section addresses the nature of the imagination, its role in emotion production, and its

sophistication manifestation in childhood The essays in the second section focus on the nature of pretence and how pretence is implicated in adult communication The third section addresses the problem of imaginative resistance the striking fact that when we encounter morally repugnant assertions in fiction we seem to resist imagining them and accepting them as fictionally true In the final section contributors explore the relation between imagining conceiving and judgements of possibility and impossibility The Architecture of the Imagination will be an essential resource for the growing number of philosophers and psychologists studying the nature of the imagination and on its role in philosophy aesthetics and everyday life

Subjunctive reasoning John L. Pollock,1976 *Meaning, Mind, and Knowledge* Christopher S. Hill,2014 Acting together requires collective intentions The contributions to this volume seek to critically assess or to enrich theories of collective intentionality by exploring topics such as collective belief mutual coordination and the explanation of group behavior
