Substitute Parents:

Personality and Family Characteristics of Substitute Parents to Special-needs Children June Rose, 1999 *The Impact of Digitalization in a Changing Educational Environment* Arinushkina, Anna A., Morozov, Alexander V., Robert, Irena V., 2023-09-18 A resounding question from the world of education remains who truly benefits from digitalization in education and does it why matter Digital transformation brings about fundamental changes to the educational methodological base ensuring access to a wide array of information in various forms but often the potential drawbacks are not properly addressed This can include weakened reasoning skills and shallow learning due to excessive reliance on visualized information The Impact of Digitalization in a Changing Educational Environment showcases how digital transformation can lead to a high quality restructuring of the entire educational system while navigating potential pitfalls Addressing the psychological and pedagogical aspects the book emphasizes that the successful development of digital learning environments hinges on not only advanced technical resources but also competent support and supervision of educational process participants Focusing on the impact of digitalization and digital transformation this book brings to light the latest teaching methodologies providing practical advice for managing the changes induced by digitalization in educational institutions The findings presented are rooted in current practices developed by leading scholars offering actionable recommendations for improving the lives of children families parents and educators in this evolving educational landscape Intended for a diverse readership including policymakers academics educators researchers parents school administrators and the learning industry this book also serves as an invaluable resource for further and continuing education lecturers Its extensive coverage includes various fields like digital transformation educational management quality assessment cross cultural studies distant learning continuous professional development and more

Adapting Minds David J. Buller, 2006-02-17 Was human nature designed by natural selection in the Pleistocene epoch The dominant view in evolutionary psychology holds that it was that our psychological adaptations were designed tens of thousands of years ago to solve problems faced by our hunter gatherer ancestors In this provocative and lively book David Buller examines in detail the major claims of evolutionary psychology the paradigm popularized by Steven Pinker in *The Blank Slate* and by David Buss in *The Evolution of Desire* and rejects them all This does not mean that we cannot apply evolutionary theory to human psychology says Buller but that the conventional wisdom in evolutionary psychology is misguided Evolutionary psychology employs a kind of reverse engineering to explain the evolved design of the mind figuring out the adaptive problems our ancestors faced and then inferring the psychological adaptations that evolved to solve them In the carefully argued central chapters of *Adapting Minds* Buller scrutinizes several of evolutionary psychology's most highly publicized discoveries including discriminative parental solicitude the idea that stepparents abuse their stepchildren at a higher rate than genetic parents abuse their biological children Drawing on a wide range of empirical research including his own large scale study of child abuse he shows that none is actually supported by

the evidence Buller argues that our minds are not adapted to the Pleistocene but like the immune system are continually adapting over both evolutionary time and individual lifetimes We must move beyond the reigning orthodoxy of evolutionary psychology to reach an accurate understanding of how human psychology is influenced by evolution When we do Buller claims we will abandon not only the quest for human nature but the very idea of human nature itself *A Follow-up Study of War Neuroses* Norman Quintus Brill, Gilbert Wheeler Beebe, 1956 Substitute Parents in Nonprofit Educational Institutions United States. Employment Standards Administration, 1979 **Assessment of Parenting** Dr Peter Reder, Clare Lucey, 2014-02-04 These are the sorts of questions that face mental health practitioners who are increasingly involved in complex child care cases which come before the courts They have been given little guidance to date on how these assessments should be made especially where a decision has to be taken as to whether a child has experienced significant harm In this much needed book senior clinicians consider the principles and practice of parenting assessments and how they guide courts decisions about children s welfare They describe a number of frameworks for assessment and discuss the factors which help predict the risk of future maltreatment or the likelihood of successful rehabilitation Throughout the book the emphasis is on the need to integrate the assessments of all relevant professionals in order to serve the best interests of the child while also addressing the parents potential to improve their caretaking skills Offering guidance in areas of crucial significance for child family and professional alike *Assessment of Parenting* will be widely welcomed *A Follow-up Study of War Neuroses*, 22 January 1955 United States.
