Homeland Insecurity Louis A. Cainkar, 2009-07-02 In the aftermath of 9 11 many Arab and Muslim Americans came under intense scrutiny by federal and local authorities as well as their own neighbors on the chance that they might know support or actually be terrorists As Louise Cainkar observes even U S born Arabs and Muslims were portrayed as outsiders an image that was amplified in the months after the attacks She argues that 9 11 did not create anti Arab and anti Muslim suspicion rather their socially constructed images and social and political exclusion long before these attacks created an environment in which misunderstanding and hostility could thrive and the government could defend its use of profiling Combining analysis and ethnography Homeland Insecurity provides an intimate view of what it

means to be an Arab or a Muslim in a country set on edge by the worst terrorist attack in its history Focusing on the metropolitan Chicago area Cainkar conducted more than a hundred research interviews and five in depth oral histories In this the most comprehensive ethnographic study of the post 9 11 period for American Arabs and Muslims native born and immigrant Palestinians Egyptians Lebanese Iraqis Yemenis Sudanese Jordanians and others speak candidly about their lives as well as their experiences with government public mistrust discrimination and harassment after 9 11 The book reveals that Arab Muslims were more likely to be attacked in certain spatial contexts than others and that Muslim women wearing the hijab were more vulnerable to assault than men as their head scarves were interpreted by some as a rejection of American culture Even as the 9 11 Commission never found any evidence that members of Arab or Muslim American communities were involved in the attacks respondents discuss their feelings of insecurity a heightened sense of physical vulnerability and exclusion from the guarantees of citizenship afforded other Americans Yet the vast majority of those interviewed for Homeland Insecurity report feeling optimistic about the future of Arab and Muslim life in the United States Most of the respondents talked about their increased interest in the teachings of Islam whether to counter anti Muslim slurs or to better educate themselves Governmental and popular hostility proved to be a springboard for heightened social and civic engagement Immigrant organizations religious leaders civil rights advocates community organizers and others defended Arabs and Muslims and built networks with their organizations Local roundtables between Arab and Muslim leaders law enforcement and homeland security agencies developed better understanding of Arab and Muslim communities These post 9 11 changes have given way to stronger ties and greater inclusion in American social and political life Will the United States extend its values of freedom and inclusion beyond the politics of us and them stirred up after 9 11 The answer is still not clear Homeland Insecurity is keenly observed and adds Arab and Muslim American voices to this still unfolding period in American history

**The Oxford Handbook of Cognitive Archaeology** Thomas Wynn, Karenleigh Overmann, Frederick Coolidge, 2024-03-27 *The Oxford Handbook of Cognitive Archaeology* is a landmark publication showcasing the theories, methods, and accomplishments of archaeologists who investigate the human mind, including its evolutionary development, its ideation, thoughts, and beliefs, and its very nature through material forms. The volume encompasses the wide spectrum of the discipline, showcasing contributions from more than 50 established and emerging scholars from Europe, Africa, Asia, Australia, and the Americas. Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations. Significantly, the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium. These examples include the gamut of methods and techniques, including typology, replication studies, changes, operatoires, neuroarchaeology, ethnographic comparison, and the direct historical approach.
