Animate Nature J. Arthur Thompson, M.A., LL.D.,1920 *Ersatz America* Rebecca Mark,2014-12-02 From the popular legend of Pocahontas to the Civil War soap opera *Gone with the Wind* to countless sculpted heads of George Washington that adorn homes and museums whole industries have emerged to feed America's addiction to imaginary histories that cover up the often violent acts of building a homogeneous nation In *Ersatz America* Rebecca Mark shows how this four hundred year old obsession with false history has wounded democracy by creating language that is severed from material reality Without the mediating touchstones of body and nature creative representations of our history have been allowed to spin into dangerous abstraction Other scholars have addressed the artificial qualities of the collective American memory but what distinguishes *Ersatz America* is that it does more than simply deconstruct it provides a map for regeneration Mark contends that throughout American history citizen artists have responded to the deadly memorialization of the past with artistic expressions and visual artifacts that exist outside the realm of official language creating a counter narrative These examples of what she calls visceral graphism are embodied in and connected to the human experience of indigenous peoples enslaved Africans and silenced women giving form to the unspeakable We must learn Mark suggests to read the markings of these works against the iconic national myths In doing so we can shift from being mesmerized by the monumentalism of this national mirage to embracing the regeneration and recovery of our human history **Down from the Trees** Ralph D. Hermansen,2018-06-26 *Down from the Trees* Man's Amazing Transition from Tree Dwelling Ape Ancestors covers the evolution of man from tree dwelling ape to Homo sapiens as he is today Using easy to read language the author takes complex jargon filled material and extracts the essence of the topic and conveys it in a clear and engaging manner He approaches the subject of human evolution from three different disciplines fossil evidence and its interpretation evolutionary theory and its applicability and genetic evidence and its ability to unlock prehistoric information The third discipline has advanced unbelievably in the last few years and this book includes the most up to date research There is nothing more interesting to humans than the story of their origins The evolutionary process of a tree dwelling ape becoming a walking talking man who has developed the technology to walk on the moon transplant hearts or modify living things is no trivial story This book provides a fascinating and comprehensive view of what science has learned of human evolution *The System of Animate Nature* John Arthur Thomson,1920 *Lessons on Living* H.
