The Bird Flu Preparedness Planner:

The Bird Flu Preparedness Planner Grattan Woodson, 2005-11-15 Why Take the Chance The Bird Flu is real It s deadly And it s spreading Within the next year it could threaten your home your livelihood your family and even your life It may not become the pandemic many experts now fear but do you really want to take the chance of being totally unprepared This book is not hype It s not scare tactics It s the facts what avian influenza is and what it can become from a physician who understands not only the bird flu but what you realistically can and should do to protect your loved ones Inside you ll find A brief history of flu pandemics like the 1918 flu The current state of the bird flu Possible consequences of a flu epidemic How to prevent infection for you and your family Your personal medical and supply kit What to do if someone is infected There s no better preparation than information Before you make any decisions get the facts from the doctor who knows

Investigating Influenza and Bird Flu Claire Wilson, 2010-07-01 Provides information about influenza and bird flu including treatment diagnosis history medical advances and true stories about people with the diseases Provided by publisher **The national pandemic influenza preparedness and response plan** United States. Congress. House. Committee on Government Reform, 2005 [Avian Flu](#) United States. Congress. House. Committee on International Relations, 2006 *Global Spread of the Avian Flu* Marilyn R. Bethe, 2006 Avian influenza or bird flu is a contagious disease of animals caused by viruses that normally infect only birds and less commonly pigs Avian influenza viruses are highly species specific but have on rare occasions crossed the species barrier to infect humans In domestic poultry infection with avian influenza viruses causes two main forms of disease distinguished by low and high extremes of virulence The so called low pathogenic form commonly causes only mild symptoms ruffled feathers a drop in egg production and may easily go undetected The highly pathogenic form is far more dramatic It spreads very rapidly through poultry flocks causes disease affecting multiple internal organs and has a mortality that can approach 100% often within 48 hours A pandemic can start when three conditions have been met a new influenza virus subtype emerges it infects humans causing serious illness and it spreads easily and sustainably among humans The H5N1 virus amply meets the first two conditions it is a new virus for humans H5N1 viruses have never circulated widely among people and it has infected more than 100 humans killing over half of them No one will have immunity should an H5N1 like pandemic virus emerge All prerequisites for the start of a pandemic have therefore been met save one the establishment of efficient and sustained human to human transmission of the virus The risk that the H5N1 virus will acquire this ability will persist as long as opportunities for human infections occur These opportunities in turn will persist as long as the virus continues to circulate in birds and this situation could endure for some years to come **Avian Flu** , 2006 **The Threat of and Planning for Pandemic Flu** United States.
