The Methuen Drama Companion to Performance Art Bertie Ferdman, Jovana Stokic, 2020-02-20 The Methuen Drama Companion to Performance Art offers a comprehensive guide to the major issues and interdisciplinary debates concerning performance in art contexts that have developed over the last decade It understands performance art as an institutional cultural and economic phenomenon rather than as a label or object Following the ever increasing institutionalization and mainstreaming of performance the book s chapters identify a marked change in the economies and labor practices surrounding performance art and explore how this development is reflective of capitalist approaches to art and event production Embracing what we perceive to be the oxymoronic status of performance art where it is simultaneously precarious and highly profitable the essays in this book map the myriad gestures and radical possibilities of this extreme contradiction This Companion adopts an interdisciplinary perspective to present performance art s legacies and its current practices It brings together specially commissioned essays from leading innovative scholars from a wide range of approaches including art history visual and performance studies dance and theatre scholarship in order to provide a comprehensive and multifocal overview of the emerging research trends and methodologies devoted to performance art

Machines That Become Us James E. Katz, 2017-07-28 Social critics and artificial intelligence experts have long prophesized that computers and robots would soon relegate humans to the dustbin of history Many among the general population seem to have shared this fear of a dehumanized future But how are people in the twenty first century actually reacting to the ever expanding array of gadgets and networks at their disposal Is computer anxiety a significant problem paralyzing and terrorizing millions or are ever proliferating numbers of gadgets being enthusiastically embraced Machines that Become Us explores the increasingly intimate relationship between people and their personal communication technologies In the first book of its kind internationally recognized scholars from the United States and Europe explore this topic Among the technologies analyzed include the Internet personal digital assistants PDAs mobile phones networked homes smart fabrics and wearable computers interactive location badges and implanted monitoring devices The authors discuss critical policy issues such as the problems of information resource access and equity and the recently discovered digital dropouts phenomena The use of the word become in the book s title has three different meanings The first suggests how people use these technologies to broaden their abilities to communicate and to represent themselves to others Thus the technologies become extensions and representatives of the communicators A second sense of become applies to analysis of the way these technologies become physically integrated with the user s clothing and even their bodies Finally contributors examine fashion aspects and uses of these technologies that is how they are used in ways becoming to the wearer The conclusions of many chapters are supported by data including ethnographic observations attitude surveys and case studies from the United States Britain France Italy Finland and Norway This approach is especially valuable

Outside, America Hikaru Fujii, 2013-04-25 The idea of the

outside as a space of freedom has always been central in the literature of the United States. This concept still remains active in contemporary American fiction, however its function is being significantly changed. Outside America argues that among contemporary American novelists a shift of focus to the temporal dimension is taking place. No longer a spatial movement, the quest for the outside now seeks to reach the idea of time as a force of difference, à la Deleuze, by which the current subjectivity is transformed. In other words, the concept is taking a temporal turn. Discussing eight novelists including Don DeLillo, Richard Powers, Paul Theroux, and Annie Proulx, each of whose works describe forces of given identities, masculine identity, historical temporality, and power, etc., which block quests for the outside, Fujii shows how the outside in these texts ceases to be a spatial idea. With due attention to critical and social contexts, the book aims to reveal a profound shift in contemporary American fiction.

Audio Book Mikko Keskinen, 2008-01-01. Audio Book deals with the ways in which the auditory voices, sounds, noises, is represented in postphonograph narrative fiction. More specifically, it examines how the various technologies enabling the transmission or storing of sound and voice are figured in selected prose works. Drawing from contemporary American, British, French, and German literature, the author discusses the use of these technologies in Nicholson Baker's *Vox*, Michel Tournier's *Tristan Vox*, Heinrich Böll's *Murke's Collected Silences*, Don DeLillo's *The Body Artist*, Nick Hornby's *High Fidelity*, and Sylvia Brownrigg's *The Metaphysical Touch*. The texts foreground sound technologies: the telephone, radio, tape recorder, answering machine, record player, or counterintuitively, e-mail, in their narration and manifest important aspects of audio in literature. In prior criticism, these texts have not been systematically read from media technological perspectives. The sound technologies represented in the texts problematize the clear distinction between speech and writing, or between natural articulation and its technological reproduction. *Audio Book* suggests that literary writing is metaphorically conceivable as a transmitting and storing technology, as an audiobook of sorts, capable of recording upon writing and reproducing upon reading auditory information. The sound technologies proper have also bearing on the narrative structure, metaphors, and style of each fictional work studied in *Audio Book*. In addition, themes such as identity, genre, the nature of literary representation, and the absence/presence problem are brought to the fore on account of the technologies depicted.
