Teacher's Manual to Accompany The Complete Choral Conductor Brian R. Busch, 1984

Choral Conducting and the Construction of Meaning Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s he wishes the choir to sound The conductor's physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening But how can these forms of physical communication be explained Do they belong to a pre cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture Is body language an inherent part of musical performance styles or does it come afterwards in response to music At a practical level to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don't do it that way This book explores these questions at both theoretical and practical levels It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication studies to analyse them By comparing a variety of choral traditions it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles
