

TIPS FOR ELECTRICAL SAFETY!

OUTLET FACEPLATES

If these are hot to touch, take action right away. This is an indicator that something behind the wall might be malfunctioning and could be a fire hazard!

FLICKERING LIGHTS

Flickering lights doesn't always indicate it needs a new bulb, but try that first and if that doesn't help, contact an electrician because it could be an issue with wiring, switch or light fixture.

USE MULTI-OUTLET CONVERTERS

These should help replace the extension cords since there are multiple outlets to use. This is a safer route to go because its plugged directly into the outlets. Even though this is better, consider having more outlets installed in your home!

EXTENSION CORDS

Extension cords are a temporary fix. These leave cords exposed and could cause a fire. Also, never leave them on or under carpet floors since they tend to heat up!

CIRCUIT BREAKER

If your circuit breaker keeps tripping, don't ignore it. This is due to a bigger underlying issue that needs attention from a professional ASAP!

Absolutely the Best!
