Thick Corpusorganic Variation:

Thick Corpus, Organic Variation and Textuality in Oral Tradition Lauri Honko,2000 The articles in this volume stem from the 5th International Folklore Fellows Summer School a forum for the global evaluation of folklore methodology held in Turku in August 1999 Thick Corpus organic variation and textuality are new keywords in folklore theory They signal a shift of paradigm between the intercultural study of variation The modern scholar focuses on intensive fieldwork on living systems of tradition trying to create thick corpora of material reflecting the organic variation of folklore in context **The Homeric Simile in Comparative Perspectives** Jonathan L. Ready,2018 Presenting a new take on what made the Homeric epics such successful examples of verbal artistry this volume explores the construction of the Homeric simile and the performance of Homeric poetry from the neglected comparative perspectives offered by the study of modern day oral traditions **Text and Tradition in Early Modern North India** Tyler Williams,Anshu Malhotra,John S. Hawley,2018-01-03 Early modern India a period extending from the fifteenth to the late eighteenth century saw dramatic cultural religious and political changes as it went from Sultanate to Mughal to early colonial rule Witness to the rise of multiple literary and devotional traditions this period was characterized by immense political energy and cultural vibrancy Text and Tradition in Early Modern North India brings together recent scholarship on the languages literatures and religious traditions of northern India It focuses on the rise of vernacular languages as vehicles for literary expression and historical and religious self assertion and particularly attends to ways in which these regional spoken languages connect with each other and their cosmopolitan counterparts Hindu Muslim and Jain idioms emerge in new ways and the effect of the volume as a whole is to show that they belong to a single complex cultural conversation **Ethnologia Europaea vol. 40:2** , Words as Events Venla Sykäri,2011-02-01 Words as Events introduces the tradition of short communicative rhyming couplets the *mantin des* as still sung and recited in a variety of performance situations on the island of Crete Recently these poems have also entered modern mass media and they are widely being exchanged as text messages by Cretans Focusing on the multi functionality of the short form Sykäri demonstrates how the traditional register gives voice to individual experiences in spontaneous utterances The local focus on communicative economy and artistry is further examined in a close analysis of the processes and ideals of composition By analyzing how the restrictions of form and performative conventions in fact generate impulses of creativity the author creates a theoretical approach that is sensitive to the special characteristics of the short rhymed poetic traditions In this interdisciplinary study the reader is invited to become familiar with the current folklore theory of oral poetry which has a long tradition in Finland The author combines the results of earlier folkloristic and anthropological insights and extends the theoretical concerns further to address questions of spontaneity and individual agency The research data has been produced in communicative interactions during long term fieldwork As a result the short rhymed poetry often neglected by scholars in earlier research paradigms can now be seen in new light specifically as dialogic poetry through its extended multi layered

dialogic qualities Children's Games in the New Media Age Chris Richards, Andrew Burn, 2016-05-23 The result of a unique research project exploring the relationship between children's vernacular play cultures and their media based play this collection challenges two popular misconceptions about children's play that it is depleted or even dying out and that it is threatened by contemporary media such as television and computer games A key element in the research was the digitization and analysis of Iona and Peter Opie's sound recordings of children's playground and street games from the 1970s and 1980s This framed and enabled the research team's studies both of the Opies documents of mid twentieth century play culture and through a two year ethnographic study of play and games in two primary school playgrounds contemporary children's play cultures In addition the research included the use of a prototype computer game to capture playground games and the making of a documentary film Drawing on this extraordinary data set the volume poses three questions What do these hitherto unseen sources reveal about the games songs and rhymes the Opies and others collected in the mid twentieth century What has happened to these vernacular forms How are the forms of vernacular play that are transmitted in playgrounds homes and streets transfigured in the new media age In addressing these questions the contributors reflect on the changing face of childhood in the twenty first century in relation to questions of gender and power and with attention to the children's own participation in producing the ethnographic record of their lives FF Network for the Folklore Fellows, 2001 **NNF News**, 1998 *Mythic Discourses* Frog, Anna-Leena Siikala, Eila Stepanova, 2012 Mythic discourses in the present day show how vernacular heritage continues to function and be valuable through emergent interpretations and revaluations At the same time continuities in mythic images motifs myths and genres reveal the longue dur e of mythologies and their transformations The eighteen articles of *Mythic Discourses* address the many facets of myth in Uralic cultures from the Finnish and Karelian world creation to Nenets shamans offering multidisciplinary perspectives from twenty eastern and western scholars The mythologies of Uralic peoples differ so considerably that mythology is approached here in a broad sense including myths proper religious beliefs and associated rituals Traditions are addressed individually typologically and in historical perspective The range and breadth of the articles presenting diverse living mythologies their histories and relationships to traditions of other cultures such as Germanic and Slavic all come together to offer a far richer and more developed perspective on Uralic traditions than any one article could do alone Revoicing Sámi Narratives Coppélie Cocq, 2008 **Textualising the Siri Epic** Lauri Honko, 1998 How does an illiterate singer produce a long oral epic What is the origin of his text available only for a fleeting moment at its performance How can a multifaceted oral performance be transformed into a book The primary oral textualization and the secondary written codification of the Siri epic 15 683 lines are described in detail in the present volume on the basis of recent fieldwork among the speakers of Tulu a Dravidian language in southern Karnataka India The oral author Mr Gopala Naika is one of the many talented singers of oral epics in Tulunaadu and a possession priest in rituals which use oral epics as their mythical charter and a source of mental therapy
