The Thinking Machine Charles Judson Herrick, 1929 This is a book about the natural history of human nature It is not a book about philosophy for philosophers It is a plain and straightforward statement for ordinary people of what another very ordinary sort of man who has considerable experience with the mechanisms of human life and

how they work thinks about it all We all want to understand human nature better because it is our nature The better we understand it the more likely we are to get along with ourselves our neighbors and our surroundings in general We want to make life more worth while to get as much out of it as we can and to put as much into it as we can to make a better living and to have as much fun doing it as possible We need to know how we live what the apparatus of life is and how it works in order to make a better job of it Preface

The Big Nine Amy Webb, 2019-03-05 A call to arms about the broken nature of artificial intelligence and the powerful corporations that are turning the human machine relationship on its head We like to think that we are in control of the future of artificial intelligence The reality though is that we the everyday people whose data powers AI aren't actually in control of anything When for example we speak with Alexa we contribute that data to a system we can't see and have no input into one largely free from regulation or oversight The big nine corporations Amazon Google Facebook Tencent Baidu Alibaba Microsoft IBM and Apple are the new gods of AI and are short changing our futures to reap immediate financial gain In this book Amy Webb reveals the pervasive invisible ways in which the foundations of AI the people working on the system their motivations the technology itself is broken Within our lifetimes AI will by design begin to behave unpredictably thinking and acting in ways which defy human logic The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations desires or hopes for the future of humanity Much more than a passionate human centered call to arms this book delivers a strategy for changing course and provides a path for liberating us from algorithmic decision makers and powerful corporations
