Thinking Together:

Thinking Together Angela G. Ray, Paul Stob, 2018-04-16 Changes to the landscape of higher education in the United States over the past decades have urged scholars grappling with issues of privilege inequality and social immobility to think differently about how we learn and deliberate Thinking Together is a multidisciplinary conversation about how people approached similar questions of learning and difference in the nineteenth century In the open air in homes in public halls and even in prisons people pondered recurring issues justice equality careers entertainment war and peace life and death heaven and hell the role of education and the nature of humanity itself Paying special attention to the dynamics of race and gender in intellectual settings the contributors to this volume consider how myriad groups and individuals many of whom lived on the margins of society and had limited access to formal education developed and deployed knowledge useful for public participation and public advocacy around these concerns Essays examine examples such as the women and men who engaged lecture culture during the Civil War Irish immigrants who gathered to assess their relationship to the politics and society of the New World African American women and men who used music and theater to challenge the white gaze and settler colonists in Liberia who created forums for envisioning a new existence in Africa and their relationship to a U S homeland Taken together this interdisciplinary exploration shows how learning functioned not only as an instrument for public action but also as a way to forge meaningful ties with others and to affirm the value of an intellectual life By highlighting people places and purposes that diversified public discourse Thinking Together offers scholars across the humanities new insights and perspectives on how difference enhances the human project of thinking together **THINK**

Your Forces, and how to Use Them Prentice Mulford, 1890 **Reasonable Children** Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable

conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
