

UNHELPFUL THINKING STYLES

PREDICTIONS

I make negative predictions about what might happen in the future even though I have no way of knowing this.

I will fail my Maths test

JUDGEMENTS

I make judgements about things even though there is no evidence or facts to back this up.

They looked at me funny

CATASTROPHISING

I always think of the worst case scenario or think that something really bad is going to happen.

The car is going to crash

PERFECTIONIST

I put a lot of pressure on myself to do well and set unrealistically high expectations for myself. I think everything has to be exactly right.

I have to get full marks

NEGATIVE GLASSES

When I have my negative glasses on, I only see the bad things that happen and I don't notice any of the good things.

Today has been awful

FEELINGS

If I notice negative feelings in myself or my body and automatically think that it means something bad is happening or will happen.

I feel bad so my day will be bad

MENTAL FILTER

I tend to take more notice of the negative things in a situation and down play the positive things.

I can't believe I only got 8 out of 10

MEMORIES

Some things trigger my negative memories which makes me think something bad will happen again now.

Something bad happened here so it will again

BLACK & WHITE THOUGHTS

I usually think things are either really good or really bad and there is no in between.

I lost so I am terrible at this game

MIND READING

I assume I know what other people are thinking and this is usually negative things about me.

They think I look silly

COMPARE & DESPAIR

I notice positive things about other people but then compare myself negatively to them and think others are better than me.

Why can't I be as smart as them?

SELF-CRITICAL

I am very critical of myself and my abilities.

I can't do this because I am not smart

Challenging Mathematics In and Beyond the Classroom Edward J. Barbeau, Peter J. Taylor, 2009-04-21 In the mid 1980s the International Commission on Mathematical Instruction ICMI inaugurated a series of studies in mathematics education by commissioning one on the influence of technology and informatics on mathematics and its teaching These studies are designed to thoroughly explore topics of c temporary interest by gathering together a group of experts who prepare a Study Volume that provides a considered assessment of the current state and a guide to further developments

Studies have embraced a range of issues some central such as the teaching of algebra some closely related such as the impact of history and psychology and some looking at mathematics education from a particular perspective such as cultural differences between East and West These studies have been commissioned at the rate of about one per year Once the ICMI Executive decides on the topic one or two chairs are selected and then in consultation with them an International Program Committee IPC of about 12 experts is formed The IPC then meets and prepares a Discussion Document that sets forth the issues and invites interested parties to submit papers These papers are the basis for invitations to a Study Conference at which the various dimensions of the topic are explored and a book the Study Volume is sketched out The book is then put together in collaboration mainly using electronic communication The entire process typically takes about six years
