Third World Impact:

Globalization and the Third World B. Ghosh, H. Guven, 2006-05-26 The impact of globalization on the world's developing economies is not conclusive; studies show conflicting conclusions to the same problems in the context of globalization in developing countries. It is this analytical inconclusiveness that is at the heart of this collection, which makes a fresh attempt to study the real impact of globalization.

Jesus and the Gospel in Africa Kwame Bediako, 2004 Jesus and the Gospel in Africa collects writings by Kwame Bediako and is the best source for his insights into the Christ of present-day African history and the Jesus of African faith. Bediako shows how intimately bound together are such elements as the message of Jesus and the struggle to give birth to African democracy. Book Jacket

Science and the Construction of Women (RLE Feminist Theory) Mary Maynard, 2012-11-12 Science and the Construction of Women is a multi-disciplinary exploration of the major questions currently challenging feminist scholars of science. The authors ask key questions: What constitutes science? How have feminists investigated it? How does science construct women? How can we create a feminist discourse of science? Are the current developments to women's advantage or disadvantage? Their answers draw on material from a wide range of natural scientific, humanities, and social science sources, critically examining theoretical approaches from the postmodern to the materialist to the cyborgian. A key argument of the book is that there are strong intellectual and pragmatic reasons for the rapid development of information technology advances in fertility treatment and genetic engineering. Feminist concern for environmental issues why feminism must rigorously engage with issues of a scientific and technological nature. Science and the Construction of Women provides an important contribution to the opening up and broadening of debate in the field. This book will be an important text for students of gender and women's studies and science studies. It is also designed to be read by feminists both inside and outside the academy and to appeal to all those with interests in the sociology of knowledge and the history of ideas.

The Global Impact of the Russian Revolution Aaron Retish, Matthew Rendle, 2021-05-13 This book explores the global impact of the Russian Revolution, arguably the most influential revolution of the modern age. It explores how the Revolution influenced political movements on the radical Left and Right across the world and asks whether the Russian Revolution remains relevant today. In Part one, four leading historians debate whether or not the Russian Revolution's legacy endures today. Part two presents examples of how the Revolution inspired political movements across the world, from Latin America and East Asia to Western Europe and the Soviet Union. The Revolution inspired both sides of the political spectrum, from anarchists and leftist radicals who fought for a new socialist reality and dreamed of world revolution to those who on the far Right tried to stop them. Part three, an interview with the historian S. A. Smith, gives a personal account of how the Revolution influenced a scholar and his work. This volume shows the complexity of the Russian Revolution in today's political world. The chapters in

this book were originally published as a special issue of the journal *Revolutionary Russia*
