**Handbook of Research on Future of Work and Education: Implications for Curriculum Delivery and Work Design** Ramlall, Sunil, Cross, Ted, Love, Michelle, 2021-10-08 Higher education has changed significantly over time. In particular, traditional face-to-face degrees are being revamped in a bid to ensure they stay relevant in the 21st century and are now offered online. The transition for many universities to online learning has been painful, only exacerbated by the COVID-19 pandemic, forcing many in-person students to join their virtual peers and professors to learn new technologies and techniques to educate. Moreover, work has also changed with little doubt as to the impact of digital communication, remote work, and societal change on the nature of work itself. There are arguments to be made for organizations to become more agile, flexible, entrepreneurial, and creative. As such, work and education are both traversing a path of immense changes, adapting to global trends and consumer preferences. *The Handbook of Research on Future of Work and Education: Implications for Curriculum Delivery and Work Design* is a comprehensive reference book that analyzes the realities of higher education today, strategies that ensure the success of academic institutions, and factors that lead to student success. In particular, the book addresses essentials of online learning strategies to ensure the success of online degrees and courses, effective course development practices, key support mechanisms for students, and ensuring student success in online degree programs. Furthermore, the book addresses the future of work, preferences of employees, and how work can be re-designed to create further employee satisfaction, engagement, and increase productivity. In particular, the book covers insights that ensure that remote employees feel valued, included, and are being provided relevant support to thrive in their roles. Covering topics such as course development, motivating online learners, and virtual environments, this text is essential for academicians, faculty, researchers, and students globally.

**The Future of Work** Inka Knappertsbusch, Gerlind Wisskirchen, 2024-12-01 This book takes readers on a journey into the future of work. Following the influence of the COVID-19 pandemic, working conditions have become more flexible than ever before. The freedoms granted within this framework continue to be demanded by many employees. There are also numerous companies that have had predominantly positive experiences with this change and would like to continue with it. Against this backdrop, it is to be expected that the shift away from a traditional working environment due to the four influencing factors of demographic change, skills shortages, digitalisation, and artificial intelligence will accelerate in the future. This book provides an overview of the various design options for New Work and highlights their respective advantages and disadvantages. It also analyses new trends and forecasts relating to the future of work. In addition, the relevant legal framework is presented in a concise and easy-to-understand manner. This book provides you with the tools you need to actively shape the future of work in your company in a legally compliant manner. The editors Dr Inka Knappertsbusch is a lawyer specializing in employment law and employee data protection at the international commercial law firm CMS Germany. She advises companies primarily on restructuring and works agreements, in particular on

issues related to IT and new work Her work also focuses on data protection and artificial intelligence in employment relationships She is the co editor of the book *Arbeitswelt und KI 2030* Dr Gerlind Wisskirchen is a partner and lawyer at the international commercial law firm CMS Germany and advises multinational corporations in particular on restructuring national and international employment law and compliance issues She is also an expert on the digitalisation of the world of work with experience as a keynote speaker author and lecturer and is the editor of the report *Artificial Intelligence and Robotics and Their Impact on the Workplace* for the Global Employment Institute The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content
