Carl H. Ernst, Jeffrey E. Lovich, 2009-06-15 Winner 2011 Book Award The Wildlife Society 2009 Outstanding Academic Title
Choice Ernst and Lovich's thoroughly revised edition of this classic reference provides the most updated information ever
assembled on the natural histories of North American turtles. From diminutive mud turtles to giant alligator snappers, two of
North America's most prominent experts describe the turtles that live in the fresh, brackish, and marine waters north of
Mexico. Incorporating the explosion of new scientific information published on turtles over the past fifteen years, including the
identification of four new species, Ernst and Lovich supply comprehensive coverage of all fifty-eight species with discussions
of conservation status and recovery efforts. Each species account contains information on identification, genetics, fossil record,
distribution, geographic variation, habitat, behavior, reproduction, biology, growth, and longevity, food habits, populations,
predators, and conservation status. The book includes range maps for freshwater and terrestrial species, a glossary of
scientific names, an extensive bibliography for further research, and an index to scientific and common names. Logically
organized and richly illustrated with more than two hundred color photographs and fifty-two maps, *Turtles of the United
States and Canada* remains the standard for libraries, museums, nature centers, field biologists, and professional and amateur
herpetologists alike. **The Bookseller** ,1883 Official organ of the book trade of the United Kingdom **The national
