

About the Lesson

In this activity, students will identify whether points lie within a shaded region that is bounded by linear inequalities. The focus is on testing the points for truth in the inequality. Students will use a graph to verify their answers. As a result, students will:

- Answer True or False as to whether a point satisfies multiple conditions established by linear inequalities.

Vocabulary

- addend
- additive inverse
- integer
- subtrahend

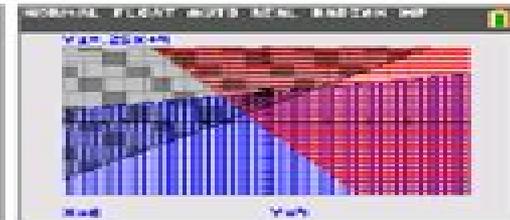

Teacher Preparation and Notes

- Students will organize their thinking by using a table on the worksheet to answer True or False as to whether a point lies within a shaded region.
- Students will use the [test] menu to evaluate inequalities as true or false.
