Hood, 2011-01-01 Cloth was one of the most important commodities in the early modern world and colonial North Americans had to develop creative strategies to acquire it Although early European settlers came from societies in which hand textile production was central to the economy local conditions in North America interacted with traditional craft structures to create new patterns of production and consumption The Weaver s Craft examines the development of cloth manufacture in early Pennsylvania from its roots in seventeenth century Europe to the beginning of industrialization Adrienne D Hood s focus on Pennsylvania and the long sweep of history yields a new understanding of the complexities of early American fabric production and the regional variations that led to distinct experiences of industrialization Drawing on an extensive array of primary sources combined with a quantitative approach the author argues that in contrast to New England rural Pennsylvania women spun the yarn that a small group of trained male artisans wove into cloth on a commercial basis throughout the eighteenth century Their production was considerably augmented by consumers purchasing cheap cloth from Europe and Asia making them active participants in a global marketplace Hood s painstaking research and numerous illustrations of textile equipment swatch books and consumer goods will be of interest to both scholars and craftspeople **Hedonizing Technologies** Rachel P. Maines, 2009-08-01 Rachel P Maines s latest work examines the rise of hobbies and leisure activities in Western culture from antiquity to the present day As technologies are hedonized consumers find increasing pleasure in the hobbies associated tools methods and instructional literature Work once essential to survival and comfort gardening hunting cooking needlework home mechanics and brewing have gradually evolved into hobbies and recreational activities As a result the technologies associated with these pursuits have become less efficient but more appealing to the new class of leisure artisans

Maines interprets the growth and economic significance of hobbies in terms of broad consumer demand for the technologies associated with them Hedonizing Technologies uses bibliometric and retail census data to show the growth in world markets for hobby craft tools books periodicals and materials from the late 18th century to today The book addresses basic issues in the history of labor and industry and makes an original contribution to the discussion of how technology and people interact
