## **The Absolute:**

*Delimitations* John Sallis, 2022-05-24 Since Hegel philosophers have declared repeatedly that metaphysics is at an end a pronouncement that has sparked much contemporary philosophical debate What exactly does the end or closure of metaphysics mean and what are the implications of this view John Sallis characterizes the end of metaphysics as a limit or horizon both enclosing metaphysical thought and opening the field of thinking beyond it He elaborates five areas in which the boundaries of thinking are extended imagination as an opening power the radicalizing of phenomenology's injunction to attend to the things themselves Heidegger's shift of thinking toward an opening or clearing archaic closure through a return to Plato and Heraclitus and the nonidentity that takes place in the act of delimitation This last question is developed in relation to Husserl's project of a pure phenomenology to the debate between hermeneutics and deconstruction and to the secluding of ground announced in Schelling's thought

*Lectures on Logic* Georg W. F. Hegel, 2008-07-02 Georg Wilhelm Friedrich Hegel gave many lectures in logic at Berlin University between 1818 and his untimely death in 1831 Edited posthumously by Hegel's son Karl these lectures were published in German in 2001 and now appear in English for the first time Because they were delivered orally *Lectures on Logic* is more approachable and colloquial than much of Hegel's formal philosophy The lectures provide important insight into Hegel's science of logic dialectical method and symbolic logic Clark Butler's smooth translation helps readers understand the rationality of Hegel's often dark and difficult thought Readers at all levels will find a mature and particularly clear presentation of Hegel's systematic philosophical vision

**The Blank Swan** Elie Ayache, 2010-05-05 October 19th 1987 was a day of huge change for the global finance industry On this day the stock market crashed the Nobel Prize winning Black Scholes formula failed and volatility smiles were born and on this day Elie Ayache began his career on the trading floor of the French Futures and Options Exchange Experts everywhere sought to find a model for this event and ways to simulate it in order to avoid a recurrence in the future but the one thing that struck Elie that day was the belief that what actually happened on 19th October 1987 is simply non-reproducible outside 19th October 1987 you cannot reduce it to a chain of causes and effects or even to a random generator that can then be reproduced or represented in a theoretical framework The Blank Swan is Elie's highly original treatise on the financial markets presenting a totally revolutionary rethinking of derivative pricing and technology It is not a diatribe against Nassim Taleb's *The Black Swan* but criticises the whole background or framework of predictable and unpredictable events white and black swans alike i.e. the very category of prediction In this revolutionary book Elie redefines the components of the technology needed to price and trade derivatives Most importantly and drawing on a long tradition of philosophy of the event from Henri Bergson to Gilles Deleuze to Alain Badiou and on a recent brand of

philosophy of contingency embodied by the speculative materialism of Quentin Meillassoux Elie redefines the market itself against the common perceptions of orthodox financial theory general equilibrium theory and the sociology of finance This book will change the way that we think about derivatives and approach the market If anything derivatives should be renamed contingent claims where contingency is now absolute and no longer derivative and the market is just its medium The book also establishes the missing link between quantitative modelling no longer dependent on probability theory but on a novel brand of mathematics which Elie calls the mathematics of price and the reality of the market

**THE BRAHM NIRUPAN OF KABIR** J. Das, 2013-11-20 The word Brahm means the Absolute or Ultimate Reality that is the primal cause of the existence of the universe and all beings Nirupan means the form or nature of that Reality For simplicity we can say God Yet we know that God is beyond forms and attributes that we can ascribe to Him But we need to use words to communicate so Kabir explains to his disciple that the Ultimate cannot be described in words but must be experienced inwardly He then describes various methods of approaching God the negative actions to avoid and the virtuous ones to be cultivated as one progresses on the spiritual path to enlightenment Kabir uses several Indian analogies and metaphors to explain the teachings to his earnest disciple

**Diachronic, Typological, and Areal Aspects of Converbs** Paola Cotticelli-Kurras, Eystein Dahl, Jelena Živojinović, 2024-12-30 This book deals with the category of converbs whose denomination refers to a set of structures which cross linguistically are not comparable Specifically we tackle the following topics 1 converbs and related constructions as areal features distinguishing between a general coordinating and subordinating type of converb 2 converbs in the context of linguistic families particularly in the Indo European domain displaying different non finite structures to express the adverbial domain 3 converbial constructions and competing construction types 4 the diachronic typology of converbs and their source constructions
